

COMPUTER-AIDED DESIGN OF POLYMER-MATRIX COMPOSITE STRUCTURES

**EDITED BY
SUONG VAN HOA**

Contents

Preface	iii
Contributors	ix
1 Introduction	1
<i>Suong Van Hoa</i>	
References	5
2 Material Selection for Design	7
<i>Suong Van Hoa</i>	
References	13
3 Fabrication Considerations	15
<i>X. R. Xiao</i>	
3.1 Introduction	15
3.2 Composite Materials Systems	16
3.3 Autoclave Molding	19
3.4 Filament Winding	24
3.5 Textile Processes	35
3.6 Pultrusion	41
3.7 Resin Transfer Molding (RTM)	42
3.8 Thermoplastic Processing	45

3.9 Summary	56
Symbols	58
References	59
4 Analytic Programs	67
<i>Suong Van Hoa</i>	
4.1 Introduction	67
4.2 Elements of Laminate Theory	67
4.3 Failure Criteria	76
4.4 Laminate Programs	79
4.5 Discussion	132
References	133
5 Woven Fabric Composites: Computer-Aided Design, Fabrication, and Structural Analysis	137
<i>T. Vu-Khanh and B. Liu</i>	
5.1 Introduction	137
5.2 Analysis of the Thermoelastic Properties of Orthogonal Woven Fabric Composites	139
5.3 Modeling of Fiber Rearrangement and Thermomechanical Properties of Deformed Woven Fabric Composites	147
5.4 Computer-Aided Design and Structural Analysis	155
5.5 Conclusion	165
References	165
6 Buckling of Composite Structures	169
<i>Jorn S. Hansen</i>	
6.1 Introduction	169
6.2 Comparison: Composite and Metal Plates	171
6.3 Plate Examples	180
6.4 Buckling Load Optimization	195
6.5 Summary	206
References	207
7 Design for Impact Resistance	209
<i>Serge Abrate</i>	
7.1 Introduction	209
7.2 Impact Damage	210
7.3 Residual Properties	216

Contents	vii
7.4 Analysis of Impact Dynamics	218
7.5 Damage Prediction	224
7.6 Predictions of Residual Properties	225
7.7 Ballistic Impact	226
7.8 Hypervelocity Impact	228
7.9 Impact of Sandwich Panels with Laminated Facings	228
7.10 Computer-Aided Design Aspects	232
7.11 Conclusion	233
References	234
8 Design of Joints in Composite Structures	243
<i>Larry B. Lessard, Cheung J. Poon, and Robert F. Scott</i>	
8.1 Introduction	243
8.2 Mechanically Fastened Joints	244
8.3 Adhesively Bonded Composite Joints	273
8.4 Discussion and Conclusions	283
References	284
9 Finite Elements for Analysis of Composite Structures	289
<i>Suong Van Hoa and Wei Feng</i>	
9.1 Introduction	289
9.2 Constitutive Relations for an Orthotropic Layer	292
9.3 Theories for Composite Structures	294
9.4 Finite-Element Models	300
9.5 Package Programs	334
9.6 Conclusion	352
References	353
Index	361
