

CONDUCTIVE POLYMERS AND PLASTICS

*in Industrial
Applications*

Larry Rupprecht, Editor

Society of Plastics Engineers

Plastics Design Library

Table of Contents

Preface	vii
<i>Larry Rupprecht</i>	
Electrical Conductivity in Conjugated Polymers	1
<i>Arthur J. Epstein</i>	
Polyaniline as Viewed from a Structural Perspective	11
<i>M. J. Winokur, B. R. Mattes</i>	
Processability of Electrically Conductive Polyaniline Due to Molecular Recognition	19
<i>Terhi Vikki, Olli Ikkala, Lars-Olof Pietilä, Heidi Österholm, Pentti Passinemi, Jan-Erik Österholm</i>	
Crystallinity and Stretch Orientation in Polyaniline Camphor-Sulphonic Acid Films	25
<i>L. Abell, P. Devasagayam, P. N. Adams A. P. Monkman</i>	
Structure-Property Characteristics of Ion Implanted Syndiotactic Polystyrene	35
<i>Chang-Meng Hsiung and Caiping Han, Y. Q. Wang, W. J. Sheu, G. A. Glass, Dave Bank</i>	
Carbon Black Filled Immiscible Blend of Poly(Vinylidene Fluoride) and High Density Polyethylene: Electrical Properties and Morphology	43
<i>Jiyun Feng, Chi-Ming Chan</i>	
Conductivity/Morphology Relationships in Immiscible Polymer Blends: HIPS/SIS/Carbon Black	51
<i>R. Tchoudakov, O. Breuer, M. Narkis, A. Siegmann</i>	
Rheological Characterization of an Electrically Conductive Composite	57
<i>Allen C. Nixon</i>	
Estimation of the Volume Resistivity of Conductive Fiber Composites by Two New Models	61
<i>Mark Weber, M. R. Kamal</i>	
Effect of Thermal Treatment on Electrical Conductivity of Polypyrrole Film Cast from Solution	69
<i>J. Y. Lee, D. Y. Kim, C. Y. Kim, K. T. Song, S. Y. Kim</i>	
Creation of Electrically Conducting Plastics by Chaotic Mixing	77
<i>Radu I. Danescu, David A. Zumbunnen</i>	
Production of Electrically Conducting Plastics at Reduced Carbon Black Concentrations by Three-Dimensional Chaotic Mixing	85
<i>Radu I. Danescu, David A. Zumbunnen</i>	
Preparation of Conducting Composites and Studies on Some Physical Properties	93
<i>Jun-Seo Park, Sung-Hun Ryu, Ok-Hee Chung</i>	

Development of Electrohydrodynamic Flow Cells for the Synthesis of Conducting Polymers	99
<i>P. C. Innis, V. Aboutanos, N. Barisci, S. Moulton and G. G. Wallace</i>	
Hydroxyethyl Substituted Polyanilines: Chemistry and Applications as Resist	109
<i>Maggie A. Z. Hupcey, Marie Angelopoulos, Jeffrey D. Gelorme, Christopher K. Ober</i>	
Electroformation of Polymer Devices and Structures	115
<i>G. G. Wallace, J. N. Barisci, A. Lawal, D. Ongarato, A. Partridge</i>	
Microelectronic Encapsulation and Related Technologies: an Overview	121
<i>Stephen L. Buchwalter</i>	
Fabrication and Characterization of Conductive Polyaniline Fiber	127
<i>Hsing-Lin Wang, Benjamin R. Mattes, Yuntian Zhu, James A. Valdez</i>	
Electrically Conductive Polyaniline Fibers Prepared by Dry-Wet Spinning Techniques	135
<i>Benjamin R. Mattes, Hsing-Lin Wang, Dali Yang</i>	
Conductive Thermoplastic Compounds for EMI/RFI Applications	143
<i>Larry Rupprecht</i>	
Crystallization Kinetics in Low Density Polyethylene Composites	153
<i>Brian P. Grady, W. B. Genetti</i>	
Development of Conductive Elastomer Foams by <i>in Situ</i> Copolymerization of Pyrrole and N-Methylpyrrole	159
<i>R. A. Weiss, Yueping Fu, Poh Poh Gan, Michael D. Bessette</i>	
Neocapacitor. New Tantalum Capacitor with Conducting Polymer	167
<i>Atsushi Kobayashi, Yoshihiko Saiki, Kazuo Watanabe</i>	
Conductive Polymer-Based Transducers as Vapor-Phase Detectors	173
<i>Frederick G. Yamagishi, Thomas B. Stanford, Camille I. van Ast, Paul O. Braatz, Leroy J. Miller, Harold C. Gilbert</i>	
Conductive Polyphenylene Ether/Polyamide Blends For Electrostatic Painting Applications	181
<i>J.J. Scobbo, Jr.</i>	
Conductive Polymer Films for Improved Poling in Non-Linear Optical Waveguides	189
<i>James P. Drummond, Stephen J. Clarkson, Stephen J. Caracci, John S. Zetts</i>	
The Corrosion Protection of Metals by Conductive Polymers. II. Pitting Corrosion	195
<i>Wei-Kang Lu, Ronald L. Elsenbaumer</i>	
Studies of Electronically Conducting Polymers for Corrosion Inhibition of Aluminum and Steel	201
<i>Dennis E. Tallman, Youngun Pae, Guoliang Chen, Gordon P. Bierwagen, Brent Reems Victoria Johnston Gelling</i>	

Novel Electrically Conductive Injection Moldable Thermoplastic Composites for ESD Applications	209
Moshe Narkis, Gershon Lidor, Anita Vaxman, Limor Zuri	
Electrical Properties of Carbon Black-Filled Polypropylene/Ultra-High Molecular Weight Polyethylene Composites	219
Jiyan Feng, Chi-Ming Chan	
The Use of Conducting Polymer Composites in Thermoplastics for Tuning Surface Resistivity	225
Sam J. Dahman, Jamshid Avlyanov	
Monosandwich Injection Molding: Skin-Core-Structure and Properties of Sandwich-Molded Anti-electrostatic Components	231
K. Kuhmann, G. W. Ehrenstein	
Thermoformed Containers for Electrostatic Sensitive Devices	239
Walter E. Gately	
Electronic Packaging for the Next Century	245
Steve Fowler	
Conducting Polymers as Alignment Layers and Patterned Electrodes for Twisted Nematic Liquid Crystal Displays	253
Jerome B. Lando, J. Adin Mann, Jr., Andy Chang, Chin-Jen S. Tseng, David Johnson	
Flexible Conductive Coatings on Thermoformed Films for EMI/RFI Shielding	259
Bruce K. Bachman	
Nylon 6 in Thin-wall Housings for Portable Electronics	267
James F. Stevenson, Alan Dubin	
Finite Element Analysis Aided Engineering of Elastomeric EMI Shielding Gaskets	275
Shu H. Peng and Kai Zhang	
Index	281
