Plastics Specialists*

# Contents

1	Introduction .....	1
1.1	Scope .....	1
1.2	Reasons for Testing .....	1
1.3	Source and Condition of Test Pieces .....	4
1.3	Test Conditions .....	6
1.4	Limitations of Results .....	9
1.6	Sampling .....	11
1.7	Standards .....	12
1.8	Quality Control of Testing .....	14
1.9	Test Equipment .....	16
1.10	Product Testing .....	18
1.11	Modes of Stressing .....	21
	References .....	22
2	Test Piece Preparation .....	25
2.1	Introduction .....	25
2.2	Mixing .....	26
2.3	Moulding .....	26
2.4	Stamping from Sheet or Film .....	29
2.5	Machining .....	31
	References .....	33
3	Conditioning .....	39
3.1	Introduction .....	39

*Handbook of Polymer Testing – Short-Term Mechanical Tests*

3.2	Storage .....	39
3.3	Conditioning .....	40
3.4	Heat Treatment .....	42
3.5	Mechanical Conditioning .....	42
3.5	Test Conditions .....	43
3.6	Apparatus for Conditioning .....	44
3.6.1	Air-Conditioned Rooms .....	44
3.6.2	Enclosures .....	44
3.6.3	Hygrometers .....	45
3.6.4	Thermometers .....	46
3.6.5	Apparatus for Elevated and Sub-Ambient Temperature .....	46
	References .....	47
	Appendix A – Tables of Thermal Equilibrium Times .....	49
4	Mass, Density and Dimensions .....	65
4.1	Introduction .....	65
4.2	Measurement of Mass .....	66
4.3	Measurement of Density .....	66
4.4	Measurement of Dimensions .....	71
4.4.1	General .....	71
4.4.2	'Standard' Laboratory Procedures .....	71
4.4.3	Other Procedures .....	75
4.4.4	Surface Roughness .....	76
4.4.5	Extensometry .....	77
4.4.6	Dimensional Stability .....	77
4.4.7	Dispersion .....	78
	References .....	80
5	Hardness .....	85
5.1	Introduction .....	85

5.2	Relationships .....	86
5.3	Standard Methods .....	87
5.3.1	Shore Durometer .....	87
5.3.2	Ball Indentation .....	88
5.3.3	Rockwell .....	89
5.3.4	Softness .....	90
5.3.5	Barcol Hardness .....	91
5.4	Other Methods .....	91
	References .....	93
6	Tensile Stress-Strain .....	97
6.1	General Considerations .....	97
6.1.1	Tough Materials with a Yield Stress Greater than the Failure Stress .....	99
6.1.2	Tough Materials with a Yield Stress Lower than the Failure Stress .....	100
6.1.3	Tough Materials with the same Yield and Failure Stress .....	102
6.1.4	Brittle Materials .....	102
6.2	Test Methods .....	105
6.2.1	Standard Methods .....	105
6.2.2	Test Apparatus .....	107
6.2.3	Test Pieces .....	116
6.2.4	Procedure .....	119
	References .....	125
7	Compression Stress-Strain .....	127
7.1	Introduction .....	127
7.2	Test Apparatus .....	128
7.3	Standard Tests .....	128
7.3	Other Tests .....	131

*Handbook of Polymer Testing – Short-Term Mechanical Tests*

References .....	133
8 Shear Properties .....	135
8.1 Introduction .....	135
8.2 Standard Tests .....	138
8.3 Other Tests .....	140
References .....	142
9 Flexural Stress-Strain .....	143
9.1 General Considerations .....	143
9.2 Test Methods .....	147
9.2.1 Standard Methods .....	147
9.2.2 Test Apparatus .....	148
9.2.3 Test Pieces .....	150
9.2.4 Procedure .....	151
References .....	152
10 Impact Strength .....	153
10.1 General Considerations .....	153
10.1.1 Introduction .....	153
10.1.2 Modes of Failure .....	153
10.1.3 Factors Affecting the Impact Strength .....	154
10.2 Specific Tests .....	158
10.2.1 Pendulum Methods .....	158
10.2.2 Drop Methods .....	167
References .....	171
11 Tear Properties .....	177
11.1 Introduction .....	177
11.2 Test Piece Geometry .....	178

11.3 Standard Tests .....	180
11.4 Other Tests .....	183
References .....	184
12 Fracture Toughness .....	187
12.1 Introduction .....	187
12.2 Standard Methods .....	188
12.3 Other Methods .....	191
References .....	191
