

# Bio-Based Polymers *and* Composites

RICHARD P. WOOL • XIUZHONG SUSAN SUN

# CONTENTS

---

Preface	xiii
About the Authors	xvii
1 OVERVIEW OF PLANT POLYMERS: RESOURCES, DEMANDS, AND SUSTAINABILITY	1
<i>Xiuzhi Susan Sun</i>	
Plant Proteins	2
Plant Oils	5
Plant Starches	6
Agriculture Fibers and Cellulose	6
Market Potential for Plant Polymers	7
Sustainable Agriculture Industry of the Future	9
Conclusion	12
References	12
2 PLANT MATERIALS FORMATION AND GROWTH	15
<i>Xiuzhi Susan Sun</i>	
Plant Material Synthesis	16
Plant Growth	27
Transgenic Plants	30
References	32

3	ISOLATION AND PROCESSING OF PLANT MATERIALS	33
	<i>Xiuzhi Susan Sun</i>	
	Oil Extraction and Refining	33
	Starch Wet Milling	41
	Protein Isolation	48
	References	55
4	POLYMERS AND COMPOSITE RESINS FROM PLANT OILS	56
	<i>Richard P. Wool</i>	
	Introduction	56
	Synthetic Pathways for Triglyceride-Based Monomers	57
	Polymers from Plant Oils	75
	Properties of Plant Oil Resins	85
	Castor Oil-Based Polymer Properties	102
	Summary of Plant Oil-Based Polymer Properties	110
	References	111
5	COMPOSITES AND FOAMS FROM PLANT OIL-BASED RESINS	114
	<i>Richard P. Wool</i>	
	Triglyceride-Based Composite Materials	115
	Manufacturing of Glass Fiber-Reinforced Composites	117
	Composite Properties	118
	Sheet Molding Compound	123
	Bio-Based Polymeric Foams	135
	Summary of Bio-Based Composites	146
	References	147
6	FUNDAMENTALS OF FRACTURE IN BIO-BASED POLYMERS	149
	<i>Richard P. Wool</i>	
	Fracture of Polymers: Fundamental Theory	150
	Applications of Fracture Theory	156
	Microscopic to Macroscopic Fracture Relations	172
	Polymer-Polymer Interfaces	176
	Polymer-Solid Interfaces	191

Summary of Fractures in Bio-Based Polymers	198
References	199
<b>7 PROPERTIES OF TRIGLYCERIDE-BASED THERMOSETS</b>	<b>202</b>
<i>Richard P. Wool</i>	
Introduction	203
Distribution of Fatty Acids and Unsaturation Sites in Triglycerides	205
Distribution of Functional Groups on Triglycerides	206
Cross-Link Density	208
Tensile Properties	213
Computer Simulations of Triglyceride Structure and Strength	217
Glass Transition Temperature versus Structure	223
Rheology of Triglyceride Resins	232
Results and Discussion	235
Summary of Triglyceride Rheology	252
References	253
<b>8 PRESSURE-SENSITIVE ADHESIVES, ELASTOMERS, AND COATINGS FROM PLANT OIL</b>	<b>256</b>
<i>Richard P. Wool</i>	
Introduction to Pressure-Sensitive Adhesives	257
Macroemulsion and Miniemulsion Polymerization	259
Polymer Characterization	261
Polymer Properties	261
Polymer-Solid Adhesion Modification of PSAs	269
Bio-Based Elastomers	274
Bio-Based Coatings	282
References	289
<b>9 THERMAL AND MECHANICAL PROPERTIES OF SOY PROTEINS</b>	<b>292</b>
<i>Xiuzhi Susan Sun</i>	
Structure and Thermal Behavior of Soy Protein	292
Curing Strength of Soy Proteins	300
Mechanical Properties of Soy Proteins	305
Physical Aging of Soy Protein Plastics	311

	Compatibility of Soy Protein with Polyester	313
	Water Absorption of Soy Protein	319
	Summary	323
	References	323
<b>10</b>	<b>SOY PROTEIN ADHESIVES</b>	<b>327</b>
	<i>Xiuzhi Susan Sun</i>	
	Protein Adhesion Mechanism	328
	Protein Unfolding and Adhesive Properties	332
	Effects of Curing Temperature and Pressure on Adhesive Strength	340
	Viscosity of Soy Protein Adhesives	343
	Natural Straw Composites with Soy Protein Adhesives	345
	Production of Low-Cost Adhesive in Powder Form	349
	Soy Protein Latex-Like Adhesives	354
	Adhesive Strength and Water Resistance at Isoelectric pH	359
	References	366
<b>11</b>	<b>PLASTICS DERIVED FROM STARCH AND POLY (LACTIC ACIDS)</b>	<b>369</b>
	<i>Xiuzhi Susan Sun</i>	
	Starch Structure	369
	Thermal Properties of Starch	372
	Starch as a Filler	375
	Starch as a Nucleating Agent	381
	Coupling Reagents for Starch and PLA Blends	382
	Role of Water in Starch and PLA Blends	394
	Plasticization of Starch and PLA Blends	396
	Physical Aging of Starch and PLA Blends	403
	Summary	405
	References	407
<b>12</b>	<b>BIO-BASED COMPOSITES FROM SOYBEAN OIL AND CHICKEN FEATHERS</b>	<b>411</b>
	<i>Richard P. Wool</i>	
	Introduction	411
	Processing of Chicken Feather Fiber Composites	413
	Electronic Materials from Feather Composites	424
	Mechanical and Fracture Properties	428

	Carbon Fibers from Chicken Feathers	435
	Summary of KFS Composites	445
	References	446
<b>13</b>	<b>HURRICANE-RESISTANT HOUSES FROM SOYBEAN OIL AND NATURAL FIBERS</b>	<b>448</b>
	<i>Richard P. Wool</i>	
	Introduction and Background	449
	Bio-Based Materials	452
	Composite Processing and Manufacturing	455
	Applications: Housing Construction Material	460
	Design of the Bio-Based Composite Roof	466
	Design, Testing, and Evaluation of a Model Beam	468
	Building a Bio-Based Composite Roof	475
	Other Potential Applications	477
	References	480
<b>14</b>	<b>CARBON NANOTUBE COMPOSITES WITH SOYBEAN OIL RESINS</b>	<b>483</b>
	<i>Richard P. Wool</i>	
	Introduction to Carbon Nanotubes	484
	Single-Walled Carbon Nanotube Composites	485
	Multiple-Walled Carbon Nanotube Composites	490
	On the Dispersibility of Carbon Nanotubes	506
	Summary	519
	References	520
<b>15</b>	<b>NANOCLAY BIOCOMPOSITES</b>	<b>523</b>
	<i>Richard P. Wool</i>	
	Preparation of Nanoclay-Soybean Oil Composites	526
	Soy-Nanoclay Composites	529
	Summary	549
	References	549
<b>16</b>	<b>LIGNIN POLYMERS AND COMPOSITES</b>	<b>551</b>
	<i>Richard P. Wool</i>	
	Introduction to Lignin	552
	Lignin Applications	557

Lignin Modification	562
Unmodified Lignin Addition to Soybean Oil Monomers	564
Chemical Modification of Kraft Lignin	569
Flory-Huggins Theory	574
Butyrate Kraft Lignin in Thermosetting Polymers	578
Comment on Biorefinery	591
References	593
Index	599
