Preface.....	ix
--------------	----

## Section I Theory, Models, Decision Tools

<b>1. Engineering in a Global Age.....</b>	<b>3</b>
Engineering, Change, and Resistance .....	8
Conclusion .....	9
Review and Study Questions.....	10
Notes.....	10
<b>2. A Global Engineering Model.....</b>	<b>13</b>
The Global Organization Layer .....	15
The Operational Layer .....	18
Global Supply Chain.....	19
Global Market Participation .....	21
Global Resources.....	22
The Context Layer.....	22
Complicating the Concept of National Cultures.....	26
Some Nations Are Mazes of Subcultures .....	27
Globalization Changes Cultures.....	27
Organizations Have Cultures of Their Own .....	28
The Political and Economic Dimensions .....	31
Conclusion .....	33
Review and Study Questions.....	34
Notes.....	34
<b>3. Decision Making in Global Projects .....</b>	<b>39</b>
Introduction.....	39
Analytical Hierarchical Process .....	39
Application Example: Decision Making under Certainty	
Using AHP.....	41
Integrating GEM and AHP.....	44
Data Gathering.....	44
Example: MexPlast Goes Global.....	45
The Decision Problem .....	49
Conclusions.....	52
Review and Study Questions.....	53
Notes.....	54

## Section II Case Studies: Cultural Emphasis

<b>4. MEPO Manages Culture</b> .....	57
French and Mexican Culture: The Best of Both Worlds? .....	57
The Facts of the Case.....	60
Problem 1: What's Wrong with the Molds? .....	61
Problem 2: How Do We Make That Fender Fit?.....	62
Interpretation.....	64
Conclusions.....	69
Review and Study Questions.....	71
Notes.....	72
<b>5. USAHP Confronts Mexico's Subcultures</b> .....	75
U.S. and Mexican Cultures: So Close, and Yet So Far.....	75
Characteristics of U.S. Culture.....	76
A Review of Mexican Culture.....	76
The Culture of Tixtlan State .....	77
The Facts of the Case .....	79
Implementing the Total Productive Maintenance Concept.....	81
Phase I: The Early Years of AM.....	82
Phase II: Starting Over .....	84
Interpretation.....	85
Interpretation of Phase I.....	87
Interpretation of Phase II.....	90
Review and Study Questions.....	90
Notes.....	92
<b>6. Implementing a Global Engineering Perspective</b> .....	95
Internationalization of Automobile Production.....	95
Localization Influence Factors .....	100
Localization of Products .....	100
Localization in the Product Development Process .....	103
Localization in Its Most Extreme Form: Customization .....	104
Platform and Module Strategies .....	105
Upcoming Strategic Challenges.....	107
A Case Study in Global Automotive Engineering: The German-Mexican Partnership .....	109
Localization Influence Factors and the Mexican Auto Industry.....	111
Required Factor 1: Geography.....	111
Required Factor 2: Legal System .....	114
Required Factor 3: Technological Influences.....	117
Optional Factor 1: Economic Situation and System .....	118
Optional Factor 2: Sociopolitical Situation and System.....	120
Optional Factor 3: Culture .....	122

Conclusion .....	124
Review and Study Questions .....	125
Notes .....	127

### Section III Case Studies: Engineering Predominance

<b>7. SmartDrill Stays Home .....</b>	<b>131</b>
Culture, Communication, and Decision Making .....	134
The Facts of the Case .....	137
Moving South (and East) .....	138
Why Wouldn't You Move to Mexico? .....	140
A Meeting with Jorge .....	143
Interpretation .....	145
Review and Study Questions .....	148
Notes .....	148
<b>8. Do What You're Told, and Don't Confuse Me with Facts .....</b>	<b>151</b>
Cultures, Decision Making, and Organizational Learning .....	151
The Facts of the Case .....	155
TMG008 Demand and Inventory Analysis .....	156
Initial Ordering Policy .....	157
Dealing with Transportation Costs .....	158
Back to Inventory Control .....	160
A Year Later .....	160
Juan Revises His Plans .....	162
Managing Inventory .....	163
Complications with Sharing Information .....	165
Interpretation .....	167
Review and Study Questions .....	171
Appendix .....	171
Notes .....	172
<b>9. The Wisdom of Getting Everyone Involved: Communication and (Un)coordination at HOCH .....</b>	<b>175</b>
Long Histories, Different Cultures .....	176
The Facts of the Case .....	177
Interpretation .....	182
Power and Politics Complicate Network Structures .....	183
Communication Processes Complicate Network Structures .....	184
Potential Sources of Communication Breakdowns .....	184
Global Context .....	187
Postscript on Life in Network Organizations .....	189
Creating Effective Integrating Structures .....	190

Creating Effective Communication Technologies.....	191
Power, Politics, and Incentives in Network Organizations.....	192
Review and Study Questions.....	194
Notes.....	195
<b>Section IV Case Studies: Applying Concepts</b>	
<b>10. Technical Consulting and Organizational Recovery at CHips.....</b>	<b>201</b>
The Paradox of Cross-National Operations.....	202
Does Technology Transcend Culture? .....	204
The Facts of the Case.....	204
Phase I.....	205
Phase II.....	207
Interpretation.....	209
Forms of Consulting.....	210
Relational Consulting at CHips .....	212
Review and Study Questions.....	213
Notes.....	214
<b>11. Bucket Brigades Work, but Why?.....</b>	<b>217</b>
The Facts of the Case.....	218
Analyzing the Causes of the Problem.....	219
Effects of Turnover.....	221
Dynamic Work Allocation Methods (Bucket Brigades) to the Rescue .....	222
Proposal.....	224
Implementation .....	225
Hurdles Overcome.....	227
Results.....	228
A Turnover Interpretation .....	228
A Motivational Interpretation.....	229
Review and Study Questions.....	230
Appendix .....	231
Notes.....	232
<b>Index.....</b>	<b>233</b>
