THOMSON  
COURSE TECHNOLOGY

PRINCIPLES OF  
INFORMATION  
SYSTEMS

EIGHTH EDITION

RALPH STAIR • GEORGE REYNOLDS

\* Includes MIS Companion CD  
and access code to Web site

# BRIEF CONTENTS

## **PART 1 An Overview**

- Chapter 1** An Introduction to Information Systems
- Chapter 2** Information Systems in Organizations

## **PART 2 Information Technology Concepts**

- Chapter 3** Hardware: Input, Processing, and Output Devices
- Chapter 4** Software: Systems and Application Software
- Chapter 5** Organizing Data and Information
- Chapter 6** Telecommunications and Networks
- Chapter 7** The Internet, Intranets, and Extranets
- Part 2** World Views Case: Australian Film Studio Benefits from Broadband Networks...and Location
- Part 2** World Views Case: Virtual Learning Environment Provides Instruction Flexibility

## **PART 3 Business Information Systems**

- Chapter 8** Electronic and Mobile Commerce
- Chapter 9** Enterprise Systems
- Chapter 10** Information and Decision Support Systems
- Chapter 11** Knowledge Management and Specialized Information Systems
- Part 3** World Views Case: Kulula.com: The Trials and Tribulations of a South African Online Airline

## **PART 4 Systems Development**

- Chapter 12** Systems Development: Investigation and Analysis
- Chapter 13** Systems Design, Implementation, Maintenance, and Review
- Part 4** World Views Case: Brandon Trust Develops MIS Capability for Improved Operations and Services
- Part 4** World Views Case: Strategic Enterprise Management at International Manufacturing Corporation (IMC)

## **PART 5 Information Systems in Business and Society**

- Chapter 14** The Personal and Social Impact of Computers

Glossary

Index

Preface xxi

## **PART 1 An Overview 1**

<b>Chapter 1</b>	<b>An Introduction to Information Systems 2</b>
	<b>Nissan Motor Company, Japan 3</b>
	<b>Information Concepts 5</b>
	Data, Information, and Knowledge 5
	The Characteristics of Valuable Information 6
	The Value of Information 7
	<b>System Concepts 8</b>
	System Performance and Standards 8
	<b>Information Systems @ Work: Speeding Up Insurance Claims with New Information Systems 10</b>
	<b>What is an Information System? 11</b>
	Input, Processing, Output, Feedback 11
	Manual and Computerized Information Systems 12
	Computer-Based Information Systems 12
	<b>Business Information Systems 17</b>
	Electronic and Mobile Commerce 17
	Enterprise Systems: Transaction Processing Systems and Enterprise Resource Planning 19
	Information and Decision Support Systems 20
	Specialized Business Information Systems: Knowledge Management, Artificial Intelligence, Expert Systems, and Virtual Reality 23
	<b>Systems Development 26</b>
	Systems Investigation and Analysis 26
	Systems Design, Implementation, and Maintenance and Review 27
	<b>Information Systems in Society, Business, and Industry 27</b>
	Security, Privacy, and Ethical Issues in Information Systems and the Internet 27
	Computer and Information Systems Literacy 28
	<b>Ethical and Societal Issues: Snipermail Executive Serves Hard Time 29</b>
	Information Systems in the Functional Areas of Business 30
	Information Systems in Industry 30
	<b>Global Challenges in Information Systems 31</b>
	Case One: Shroff International Travel Care Opens Door to Philippines 37
	Case Two: Discovery Communications Digs Out of Mountains of Documents 38
<b>Chapter 2</b>	<b>Information Systems in Organizations 40</b>
	<b>General Motors, United States 41</b>
	<b>Organizations and Information Systems 42</b>
	Organizational Structures 46
	Organizational Culture and Change 49

Reengineering and Continuous Improvement	50
User Satisfaction and Technology Acceptance	52
Quality	53
Outsourcing, On-Demand Computing, and Downsizing	54
<b>Ethical and Societal Issues: Victims of Technology?</b>	<b>55</b>
<b>Competitive Advantage</b>	<b>56</b>
Factors That Lead Firms to Seek Competitive Advantage	57
Strategic Planning for Competitive Advantage	58
<b>Performance-Based Information Systems</b>	<b>59</b>
Productivity	59
Return on Investment and the Value of Information Systems	60
<b>Information Systems @ Work: Wal-Mart Stores Manage Supply Chain with RFID</b>	<b>62</b>
Risk	63
<b>Careers in Information Systems</b>	<b>63</b>
Roles, Functions, and Careers in the IS Department	64
Typical IS Titles and Functions	66
Other IS Careers	68
Case One: Itochu Kenzai Uses IS to Reduce Organizational Waste	74
Case Two: CIO Randy Mott Shakes Up Hewlett-Packard	75

## **PART 2 Information Technology Concepts 79**

Chapter 3	<b>Hardware: Input, Processing, and Output Devices</b>	<b>80</b>
	Siebel Systems, United States	81
	<b>Computer Systems: Integrating the Power of Technology</b>	<b>82</b>
	Hardware Components	83
	Hardware Components in Action	84
	<b>Processing and Memory Devices: Power, Speed, and Capacity</b>	<b>85</b>
	Processing Characteristics and Functions	85
	Memory Characteristics and Functions	87
	Multiprocessing	90
	Parallel Computing	90
	<b>Secondary Storage</b>	<b>92</b>
	Access Methods	93
	Devices	93
	<b>Ethical and Societal Issues: Backup Storage Media and Identity Theft</b>	<b>95</b>
	Enterprise Storage Options	98
	<b>Input and Output Devices: The Gateway to Computer Systems</b>	<b>99</b>
	Characteristics and Functionality	99
	Input Devices	100
	<b>Information Systems @ Work: Tablet PCs Serve Up Big Benefits for Holiday Inn Restaurants</b>	<b>104</b>
	Output Devices	106
	Special-Purpose Input and Output Devices	109

	<b>Computer System Types, Selection, and Upgrading</b>	<b>110</b>
	Computer System Types	110
	Selecting and Upgrading Computer Systems	114
	<b>Case One: Staples Unwires Point-of-Sale Terminals</b>	<b>121</b>
	<b>Case Two: Bank of New York: Mainframes or Distributed Systems</b>	<b>122</b>
<b>Chapter 4</b>	<b>Software: Systems and Application Software</b>	<b>126</b>
	<b>El-Al Airlines, Israel</b>	<b>127</b>
	<b>An Overview of Software</b>	<b>128</b>
	Systems Software	128
	Application Software	129
	Supporting Individual, Group, and Organizational Goals	129
	Installing and Removing Software for PCs	130
	<b>Systems Software</b>	<b>131</b>
	Operating Systems	132
	Current Operating Systems	135
	Workgroup Operating Systems	139
	Enterprise Operating Systems	140
	Operating Systems for Small Computers, Embedded Computers, and Special-Purpose Devices	141
	Utility Programs	142
	<b>Information Systems @ Work: Gas Natural: Improving Customer Service with     Mobile Software</b>	<b>143</b>
	Middleware	145
	<b>Application Software</b>	<b>146</b>
	Overview of Application Software	146
	Personal Application Software	147
	Workgroup Application Software	154
	Enterprise Application Software	154
	Application Software for Information, Decision Support, and Specialized Purposes	155
	<b>Programming Languages</b>	<b>156</b>
	The Evolution of Programming Languages	156
	<b>Software Issues and Trends</b>	<b>160</b>
	Software Bugs	160
	Copyrights and Licenses	160
	Open-Source Software	160
	<b>Ethical and Societal Issues: When Software Goes Wrong</b>	<b>161</b>
	Shareware, Freeware, and Public Domain Software	162
	Software Upgrades	163
	Global Software Support	164
	<b>Case One: DreamWorks SKJ Goes Completely Open Source</b>	<b>169</b>
	<b>Case Two: Select Comfort Finds Comfort in ERP</b>	<b>170</b>

Chapter 5	<b>Organizing Data and Information 174</b> <b>Valero Energy, United States 175</b> <b>Data Management 177</b> The Hierarchy of Data 177 Data Entities, Attributes, and Keys 178 <b>Data Modeling and the Relational Database Model 181</b> Data Modeling 181 The Relational Database Model 182 <b>Database Management Systems 186</b> Overview of Database Types 187 Providing a User View 188 Creating and Modifying the Database 188 Storing and Retrieving Data 190 Manipulating Data and Generating Reports 191 Database Administration 193 Popular Database Management Systems 194 Special-Purpose Database Systems 195 Selecting a Database Management System 195 Using Databases with Other Software 196 <b>Database Applications 196</b> Linking Databases to the Internet 196 Data Warehouses, Data Marts, and Data Mining 197 <b>Ethical and Societal Issues: Google: Protecting User Data from the Government 200</b> Business Intelligence 202 Distributed Databases 202 Online Analytical Processing (OLAP) 204 <b>Information Systems @ Work: Boston Celtics and the Business of Basketball 205</b> Object-Oriented and Object-Relational Database Management Systems 206 Visual, Audio, and Other Database Systems 206 <b>Case One: Motorola's Biometrics Solutions Require Large Self-Managing Database 212</b> <b>Case Two: Consolidating Database Management Systems in Georgia State Courts 213</b>
Chapter 6	<b>Telecommunications and Networks 216</b> <b>Virgin Entertainment Group, United States 217</b> <b>An Overview of Telecommunications 219</b> Basic Communications Channel Characteristics 220 Channel Bandwidth 220 Communications Media 220 Guided Transmission Media Types 221 Telecommunications Hardware 225 Services 226 Digital Subscriber Line (DSL) 227

	<b>Networks and Distributed Processing</b>	<b>228</b>
	Network Types	229
	<b>Ethical and Societal Issues: Sharing Workstations at Sisters of Mercy Health System</b>	<b>231</b>
	<b>Information Systems @ Work: Wireless Networks at General Motors Connect People, Machines, and Parts</b>	<b>234</b>
	Distributed Processing	235
	Client/Server Systems	235
	Communications Software and Protocols	236
	Wireless Communications Protocols	237
	Communications Software	240
	<b>Telecommunications and Network Applications</b>	<b>241</b>
	Linking Personal Computers to Mainframes and Networks	241
	Voice Mail	241
	Home and Small Business Networks	242
	Electronic Document Distribution	242
	Call Centers	242
	Telecommuting and Virtual Workers and Workgroups	243
	Videoconferencing	244
	Electronic Data Interchange	245
	Public Network Services	246
	Electronic Funds Transfer	246
	Distance Learning	247
	Team Collaboration Systems	247
	Specialized Systems and Services	248
	<b>Case One: U.S. Census-Takers Go Wireless</b>	<b>253</b>
	<b>Case Two: Delivering People More Efficiently Through Telecommunications</b>	<b>254</b>
<b>Chapter 7</b>	<b>The Internet, Intranets, and Extranets</b>	<b>256</b>
	<b>Firwood Paints, United Kingdom</b>	<b>257</b>
	<b>Use and Functioning of the Internet</b>	<b>259</b>
	How the Internet Works	261
	Internet Service Providers	263
	<b>Information Systems @ Work: Liz Claiborne Moves to IP Technologies</b>	<b>265</b>
	<b>The World Wide Web</b>	<b>266</b>
	Web Browsers	268
	Search Engines and Web Research	269
	Web Programming Languages	271
	Developing Web Content	272
	Web Services	273
	<b>Internet and Web Applications</b>	<b>274</b>
	Business Uses of the Web	274
	E-Mail, Instant Messaging, and Push Technology	275
	Internet Cell Phones and Handheld Computers	276
	Career Information and Job Searching	277
	Telnet and FTP	278

Web Log (Blog), Video Log (Vlog), and Podcasting	278
Usenet and Newsgroups	279
Chat Rooms	279
Internet Phone and Videoconferencing Services	280
Content Streaming	281
Shopping on the Web	281
Web Auctions	281
Music, Radio, Video, and TV on the Internet	282
Office on the Web	284
Internet Sites in Three Dimensions	284
Other Internet Services and Applications	284

**Intranets and Extranets 285**

**Net Issues 287**

**Ethical and Societal Issues: Surfing the Web in Anonymity 288**

Case One: Web Portal for State of Michigan Provides Services and Savings 293

Case Two: FUJI Market Switches to Web-Based Ordering System 294

**Part 2 World Views Case: Australian Film Studio Benefits from Broadband Networks...and Location 298**

**Part 2 World Views Case: Virtual Learning Environment Provides Instruction Flexibility 300**

**PART 3 Business Information Systems 303**

Chapter 8

**Electronic and Mobile Commerce 304**

**Nike, United States 305**

**An Introduction to Electronic Commerce 306**

Business-to-Business (B2B) E-Commerce 306

Business-to-Consumer (B2C) E-Commerce 307

Consumer-to-Consumer (C2C) E-Commerce 307

eGovernment 307

Multistage Model for E-Commerce 308

E-Commerce Challenges 310

**An Introduction to Mobile Commerce 312**

Mobile Commerce in Perspective 312

Technology Needed for Mobile Commerce 312

**Ethical and Societal Issues: The Power of the Cell Phone 313**

**Electronic and Mobile Commerce Applications 314**

Retail and Wholesale 314

Manufacturing 315

Marketing 316

Investment and Finance 317

**Information Systems @ Work: Acquiring a Mortgage Off and Online 319**

Auctions 320

Anywhere, Anytime Applications of Mobile Commerce 320

Advantages of Electronic and Mobile Commerce 321

	<b>Threats to Electronic and Mobile Commerce</b>	<b>322</b>
	Security	322
	Theft of Intellectual Property	322
	Fraud	323
	Invasion of Consumer Privacy	324
	Lack of Internet Access	324
	Return on Investment	324
	Legal Jurisdiction	324
	Taxation	325
	<b>Strategies for Successful E-Commerce</b>	<b>325</b>
	Defining the Web Site Functions	325
	Establishing a Web Site	326
	Building Traffic to Your Web Site	326
	Maintaining and Improving Your Web Site	327
	<b>Technology Infrastructure required to Support E-Commerce and M-Commerce</b>	<b>327</b>
	Hardware	328
	Web Server Software	328
	E-Commerce Software	329
	Electronic Payment Systems	331
	<b>Case One: Wells Fargo's Web-Enabled ATMs</b>	<b>338</b>
	<b>Case Two: Japanese Mobile Music Service Provides Peek into M-Commerce Future</b>	<b>339</b>
<b>Chapter 9</b>	<b>Enterprise Systems</b>	<b>342</b>
	<b>Barilla Wasa, Germany</b>	<b>343</b>
	<b>An Overview of Enterprise Systems: Transaction Processing Systems and Enterprise Resource Planning</b>	<b>345</b>
	Traditional Transaction Processing Methods and Objectives	346
	<b>Transaction Processing Activities</b>	<b>349</b>
	Data Collection	350
	Data Editing	351
	<b>Information Systems @ Work: Retailers Turn to Smart Carts</b>	<b>352</b>
	Data Correction	353
	Data Manipulation	353
	Data Storage	353
	Document Production and Reports	353
	<b>Control and Management Issues</b>	<b>354</b>
	Disaster Recovery Plan	354
	Transaction Processing System Audit	355
	<b>Ethical and Societal Issues: Battening Down the Systems for the Next Hurricane Season</b>	<b>356</b>
	<b>Traditional Transaction Processing Applications</b>	<b>357</b>
	Order Processing Systems	357
	Purchasing Systems	358
	Accounting Systems	359

**Enterprise Resource Planning, Supply Chain Management, and Customer Relationship Management 362**

An Overview of Enterprise Resource Planning 362

Advantages of ERP 363

Disadvantages of ERP Systems 364

Production and Supply Chain Management 366

Customer Relationship Management and Sales Ordering 367

Financial and Managerial Accounting 370

Hosted Software Model for Enterprise Software 371

**International Issues Associated with Enterprise Systems 372**

Different Languages and Cultures 372

Disparities in Information System Infrastructure 372

Varying Laws and Customs Rules 372

Multiple Currencies 373

Comparison of Several ERP Systems 373

**Case One: Pico Electronics Develops TPS to Support Rapid-Fire Transactions 379**

**Case Two: Catholic Healthcare West Implements ERP 380**

**Chapter 10 Information and Decision Support Systems 382**

**Beauté Prestige International, France 383**

**Decision Making and Problem Solving 384**

Decision Making as a Component of Problem Solving 384

Programmed versus Nonprogrammed Decisions 386

Optimization, Satisficing, and Heuristic Approaches 387

Sense and Respond 388

**An Overview of Management Information Systems 388**

Management Information Systems in Perspective 388

Inputs to a Management Information System 390

Outputs of a Management Information System 390

Characteristics of a Management Information System 392

**Ethical and Societal Issues: Management Information Systems and National Security 394**

**Functional Aspects of the MIS 395**

Financial Management Information Systems 396

Manufacturing Management Information Systems 397

Marketing Management Information Systems 400

**Information Systems @ Work: Fully Integrated Decision Support 403**

Human Resource Management Information Systems 404

Other Management Information Systems 405

**An Overview of Decision Support Systems 406**

Characteristics of a Decision Support System 407

	<b>Enterprise Resource Planning, Supply Chain Management, and Customer Relationship Management</b>	<b>362</b>
	An Overview of Enterprise Resource Planning	362
	Advantages of ERP	363
	Disadvantages of ERP Systems	364
	Production and Supply Chain Management	366
	Customer Relationship Management and Sales Ordering	367
	Financial and Managerial Accounting	370
	Hosted Software Model for Enterprise Software	371
	<b>International Issues Associated with Enterprise Systems</b>	<b>372</b>
	Different Languages and Cultures	372
	Disparities in Information System Infrastructure	372
	Varying Laws and Customs Rules	372
	Multiple Currencies	373
	Comparison of Several ERP Systems	373
	<b>Case One: Pico Electronics Develops TPS to Support Rapid-Fire Transactions</b>	<b>379</b>
	<b>Case Two: Catholic Healthcare West Implements ERP</b>	<b>380</b>
<b>Chapter 10</b>	<b>Information and Decision Support Systems</b>	<b>382</b>
	<b>Beauté Prestige International, France</b>	<b>383</b>
	<b>Decision Making and Problem Solving</b>	<b>384</b>
	Decision Making as a Component of Problem Solving	384
	Programmed versus Nonprogrammed Decisions	386
	Optimization, Satisficing, and Heuristic Approaches	387
	Sense and Respond	388
	<b>An Overview of Management Information Systems</b>	<b>388</b>
	Management Information Systems in Perspective	388
	Inputs to a Management Information System	390
	Outputs of a Management Information System	390
	Characteristics of a Management Information System	392
	<b>Ethical and Societal Issues: Management Information Systems and National Security</b>	<b>394</b>
	<b>Functional Aspects of the MIS</b>	<b>395</b>
	Financial Management Information Systems	396
	Manufacturing Management Information Systems	397
	Marketing Management Information Systems	400
	<b>Information Systems @ Work: Fully Integrated Decision Support</b>	<b>403</b>
	Human Resource Management Information Systems	404
	Other Management Information Systems	405
	<b>An Overview of Decision Support Systems</b>	<b>406</b>
	Characteristics of a Decision Support System	407
	Capabilities of a Decision Support System	409
	A Comparison of DSS and MIS	410
	<b>Components of a Decision Support System</b>	<b>410</b>
	The Database	410

	The Model Base	412
	The User Interface or Dialogue Manager	412
	<b>Group Support Systems</b>	<b>413</b>
	Characteristics of a GSS That Enhance Decision Making	413
	GSS Software	415
	GSS Alternatives	417
	<b>Executive Support Systems</b>	<b>417</b>
	Executive Support Systems in Perspective	418
	Capabilities of Executive Support Systems	419
	<b>Case One: American National Insurance Speeds Information to Customers with MIS and BPM</b>	<b>426</b>
	<b>Case Two: Transit New Zealand Reroutes Information to Avoid Traffic Jams</b>	<b>427</b>
<b>Chapter 11</b>	<b>Knowledge Management and Specialized Information Systems</b>	<b>430</b>
	<b>Lafarge, France</b>	<b>431</b>
	<b>Knowledge Management Systems</b>	<b>432</b>
	Overview of Knowledge Management Systems	433
	Data and Knowledge Management Workers and Communities of Practice	433
	Obtaining, Storing, Sharing, and Using Knowledge	434
	Technology to Support Knowledge Management	435
	<b>An Overview of Artificial Intelligence</b>	<b>437</b>
	Artificial Intelligence in Perspective	437
	The Nature of Intelligence	438
	The Difference Between Natural and Artificial Intelligence	440
	The Major Branches of Artificial Intelligence	440
	Expert Systems	440
	Robotics	440
	Vision Systems	443
	Natural Language Processing and Voice Recognition	443
	Learning Systems	444
	Neural Networks	444
	Other Artificial Intelligence Applications	445
	<b>Ethical and Societal Issues: Online Matchmaker eHarmony</b>	<b>446</b>
	<b>An Overview of Expert Systems</b>	<b>447</b>
	When to Use Expert Systems	447
	Components of Expert Systems	448
	The Inference Engine	450
	The Explanation Facility	450
	The Knowledge Acquisition Facility	450
	The User Interface	450
	Expert Systems Development	451
	Participants in Developing and Using Expert Systems	451
	Expert Systems Development Tools and Techniques	452
	Applications of Expert Systems and Artificial Intelligence	453

**Information Systems @ Work: Call Centers Use Artificial Intelligence to Improve Service to Customers** 456

**Virtual Reality** 457

Interface Devices 457

Forms of Virtual Reality 458

Virtual Reality Applications 458

**Other Specialized Systems** 461

Case One: BMW Drives Virtual Prototypes 468

Case Two: Pacific Gas and Electric Corporation Increases Customer Satisfaction with Speech Recognition 469

Part 3 World Views Case: Kulula.com: The Trials and Tribulations of a South African Online Airline 472

## **PART 4 Systems Development 475**

Chapter 12 **Systems Development: Investigation and Analysis** 476

**Nordmilch, Germany** 477

**An Overview of Systems Development** 478

Participants in Systems Development 479

Initiating Systems Development 480

Information Systems Planning and Aligning Corporate and IS Goals 481

**Information Systems @ Work: Australia's Maroochy Shire Council Gains Control over Information Overload** 484

Establishing Objectives for Systems Development 485

**Systems Development Life Cycles** 486

The Traditional Systems Development Life Cycle 487

Prototyping 488

Rapid Application Development, Agile Development, Joint Application Development, and Other Systems Development Approaches 490

The End-User Systems Development Life Cycle 491

Outsourcing and On-Demand Computing 492

**Factors Affecting Systems Development Success** 494

Degree of Change 494

**Ethical and Societal Issues: Sentinel: The FBI's New Case Management System** 496

Quality and Standards 497

Use of Project Management Tools 498

Use of Computer-Aided Software Engineering (CASE) Tools 500

Object-Oriented Systems Development 501

**Systems Investigation** 502

Initiating Systems Investigation 502

Participants in Systems Investigation 502

Feasibility Analysis 503

Object-Oriented Systems Investigation 504

The Systems Investigation Report 504

	<b>Systems Analysis</b>	<b>505</b>
	General Considerations	505
	Participants in Systems Analysis	505
	Data Collection	506
	Data Analysis	507
	Requirements Analysis	511
	Object-Oriented Systems Analysis	513
	The Systems Analysis Report	514
	<b>Case One: Applebee's Simplifies Life for Managers while Improving Service to Customers</b>	<b>520</b>
	<b>Case Two: Waeco Pacific Employees Work Together to Create New ERP System</b>	<b>521</b>
<b>Chapter 13</b>	<b>Systems Design, Implementation, Maintenance, and Review</b>	<b>524</b>
	<b>Timex, United States</b>	<b>525</b>
	<b>Systems Design</b>	<b>526</b>
	Logical and Physical Design	526
	Object-Oriented Design	527
	<b>Information Systems @ Work: Installing Wi-Fi at Southern Wine's Mega Warehouse</b>	<b>528</b>
	Interface Design and Controls	529
	Design of System Security and Controls	531
	Generating Systems Design Alternatives	535
	Evaluation Techniques	538
	Freezing Design Specifications	539
	The Contract	540
	The Design Report	540
	<b>Systems Implementation</b>	<b>541</b>
	Acquiring Hardware from an IS Vendor	542
	Acquiring Software: Make or Buy?	543
	Acquiring Database and Telecommunications Systems	545
	User Preparation	546
	IS Personnel: Hiring and Training	547
	Site Preparation	547
	Data Preparation	547
	Installation	547
	Testing	548
	Start-Up	549
	User Acceptance	550
	<b>Systems Operation and Maintenance</b>	<b>550</b>
	Reasons for Maintenance	551
	<b>Ethical and Societal Issues: San Francisco's Bay Area Rapid Transit System Upgrade</b>	<b>552</b>
	Types of Maintenance	553
	The Request for Maintenance Form	553

	Performing Maintenance	553
	The Financial Implications of Maintenance	553
	The Relationship Between Maintenance and Design	555
	<b>Systems Review</b>	<b>555</b>
	Types of Review Procedures	556
	Factors to Consider During Systems Review	557
	System Performance Measurement	557
	Case One: Port of Brisbane Develops System to Tighten Security	563
	Case Two: The Christian Science Monitor Moves to Open Source for Content Management System	564
	<b>Part 4 World Views Case: Brandon Trust Develops MIS Capability for Improved Operations and Services</b>	<b>568</b>
	<b>Part 4 World Views Case: Strategic Enterprise Management at International Manufacturing Corporation (IMC)</b>	<b>570</b>
	<b>PART 5 Information Systems in Business and Society</b>	<b>573</b>
Chapter 14	<b>The Personal and Social Impact of Computers</b>	<b>574</b>
	Johnson & Johnson, United States	575
	<b>Computer Waste and Mistakes</b>	<b>576</b>
	Computer Waste	576
	Computer-Related Mistakes	577
	<b>Preventing Computer-Related Waste and Mistakes</b>	<b>577</b>
	Establishing Policies and Procedures	577
	Implementing Policies and Procedures	578
	Monitoring Policies and Procedures	579
	Reviewing Policies and Procedures	579
	<b>Computer Crime</b>	<b>580</b>
	<b>The Computer as a Tool to Commit Crime</b>	<b>581</b>
	Cyberterrorism	582
	Identity Theft	582
	<b>The Computer as the Object of Crime</b>	<b>583</b>
	Illegal Access and Use	583
	Using Antivirus Programs	585
	<b>Information Systems @ Work: Westinghouse Finds New Tools to Guard Against Viruses</b>	<b>588</b>
	Information and Equipment Theft	589
	Software and Internet Software Piracy	589
	Computer-Related Scams	590
	International Computer Crime	591
	<b>Preventing Computer-Related Crime</b>	<b>591</b>
	Crime Prevention by State and Federal Agencies	592
	Crime Prevention by Corporations	592
	Using Intrusion Detection Software	594
	Using Managed Security Service Providers (MSSPs)	595

Internet Laws for Libel and Protection of Decency 595

Preventing Crime on the Internet 597

**Privacy Issues 597**

Privacy and the Federal Government 597

Privacy at Work 598

E-Mail Privacy 598

Privacy and the Internet 598

Fairness in Information Use 599

Corporate Privacy Policies 602

**Ethical and Societal Issues: LexisNexis Gains Public Trust Through Disclosure 603**

Individual Efforts to Protect Privacy 604

**The Work Environment 604**

Health Concerns 605

Avoiding Health and Environmental Problems 605

**Ethical Issues in Information Systems 606**

**Case One: Indigo Books and Music Align Security Strategies with Corporate Goals 612**

**Case Two: Disgruntled Employee Plants Time Bomb in Get-Rich-Quick Scheme 613**

**Glossary 617**

**Index 633**
