

Myer Ezrin

Plastics Failure Guide

Cause and Prevention

2nd Edition

HANSER

Contents

Preface to Second Edition	V
Acknowledgements	VII
First Edition.....	VII
Second Edition	IX
1 A Preliminary Look at the Nature, Causes, and Consequences of Plastics Failure.....	1
1.1 Introduction	1
1.2 Plastics	2
1.3 Polymers	3
1.4 Rubbers and Elastomers	4
1.5 Natural Polymers	4
1.6 Plastics in the Family of Materials.....	5
1.7 Common Features and Differences in Performance or Failure of all Materials	5
1.8 Unintentional Factors Affecting Failure.....	8
1.9 Types and Causes of Failure	8
1.9.1 When Failure is Not Really a Failure	11
1.10 The People Factor	13
1.11 The Consequences of Plastics Failure.....	14
1.12 Legal and Financial Aspects of Plastics Failure.....	15
1.12.1 Lessons	17
1.13 References.....	17
1.14 Papers by Myer Ezrin and Coauthors on Plastics Failure Analysis, Plastics Analysis, and Related Subjects	19
1.14.1 Plastics Failure Analysis	19
1.14.2 Plastics Analysis.....	21
1.14.3 Electrical Insulation	22
1.14.4 Solar Panel Encapsulant Discoloration	22
1.14.5 Plastics Recycling.....	23

2 Fundamental Materials Variables Affecting Processing and Product Performance or Failure	25
2.1 The Overall Picture	25
2.2 Polymer Composition	29
2.2.1 Major Categories of Plastics Composition	29
2.2.1.1 Thermoplastic and Thermosetting Plastics	29
2.2.1.2 Thermoplastic Elastomers	31
2.2.2 Types of Polymers	31
2.2.2.1 Addition Polymers Based on Vinyl Monomers	31
2.2.2.2 Thermal and Photolytic Stability of Vinyl Addition Polymers	33
2.2.2.3 Thermal Analysis in the Study of Polymer Degradation ...	36
2.2.2.4 Controlling Thermal Effects in Performance or Failure of Plastics	37
2.2.2.5 Elastomeric Addition Polymers Based on Diene Monomers	37
2.2.2.6 Condensation Polymers	37
2.2.2.7 Other Polymer Types	39
2.2.2.8 Homopolymers, Copolymers, Terpolymers, and Blends ...	40
2.3 Composition—Intentional Additives	41
2.3.1 Types of Additives	41
2.3.2 Failure Effects of Intentional Additives	41
2.3.2.1 Plasticizers	42
2.3.2.1.1 Adhesion Failure of Vinyl Floor Tiles	42
2.3.2.1.2 Other Plasticizer-Related Failures	42
2.3.2.2 Colorants	43
2.3.2.2.1 Staining of Clothes by Plastic Hangers	43
2.3.2.2.2 Effect of Colorants on Notch Sensitivity	44
2.3.2.2.3 Poor Mixing of Colorant in Water Filter Canister	44
2.3.2.3 Flame Retardants	48
2.3.2.3.1 Omission of Flame Retardants	48
2.3.2.3.2 Effect on Mold and Part Dimensions	49
2.3.2.3.3 Effect on a Secondary Part of the Product	50
2.3.2.3.4 Effect of Frozen-In Stress on Molded Parts Causing Early Failure in Service	50
2.3.2.4 Unanticipated Effect of Additive	50
2.3.2.4.1 Enhanced Crystallization Due to a Pigment	50
2.3.2.4.1.1 Shampoo Tube Screw Caps	50
2.3.2.4.1.2 The Case of the Shrinking Polyethylene Milk Case	51
2.3.2.5 Poor Dispersion of Additives—Antioxidant	52
2.3.2.6 Volatility of Additives—Antioxidant	53

2.4	Composition—Unintentional Additives	54
2.4.1	Types of Unintentional Additives	54
2.4.2	Failure Effects of Unintentional Additives	54
2.4.2.1	Extraneous Dirt, Lint, and Other Contaminant Materials ..	54
2.4.2.1.1	Contaminant from Previous Run in Extruder	55
2.4.2.2	Residual Monomer, Solvent, or Other Low Level Chemicals	59
2.4.2.3	Water	60
2.4.2.3.1	Beneficial Effects of Water Absorbed from the Air	60
2.4.2.3.2	Hydrolysis of Condensation Type Plastics in Melt Processing	60
2.4.2.3.3	Appearance Problem Due to Water in Melt Processing ...	60
2.4.2.3.4	Voids Formed by Water in Melt Processing	61
2.4.2.3.5	Water Treeing of Extruded Polyolefin Electrical Power Cables	61
2.4.2.3.6	Shrinkage and Expansion of Moldings	62
2.4.2.4	Compounding Process Aids in Additives Concentrates ...	62
2.4.2.5	Additives in Formulation Ingredients to Improve their Performance	63
2.4.2.6	Ionic Impurities from Water in Service	63
2.4.2.7	Ionic Impurities in Carbon Black	64
2.4.2.8	Trace Metal from Extruder Barrel and Screw Coating ...	64
2.4.2.9	Impurities in Intentional Additives or Processing Materials	64
2.5	Molecular Weight (MW)	64
2.6	Intermolecular Order	69
2.6.1	Crystallinity	69
2.6.2	Crosslinking	72
2.6.3	Orientation Due to Processing	74
2.6.4	Degree of Fusion	76
2.6.5	Physical Aging	76
2.7	Combined Effect of Molecular Weight and Crystallinity	77
2.8	Lessons	78
2.9	References	81
3	Failures Related to Design and Material Selection	83
3.1	Introduction	83
3.2	Basic and Practical Considerations in Design-Related Failures	83
3.2.1	The People Factor	83
3.2.2	Declaring War on Failure	85
3.2.3	To Test or Not to Test—or How Much is Enough?	86

3.2.4	The Perfect Design and Product—Does It Exist?	88
3.2.5	The Prototype	88
3.2.6	Effect of Design on Processing	88
3.2.7	Design Checklist	89
3.2.8	The Most Common Mistakes in Design of Plastics	90
3.2.8.1	Creep	90
3.2.8.2	Stress	92
3.2.8.3	Hostile Environment	92
3.2.8.4	Shrinkage	92
3.2.8.5	Color Variance	92
3.2.8.6	Gate Marks	92
3.2.8.7	Inadequate Draft	93
3.2.8.8	Sink Marks	93
3.2.8.9	Unanticipated Use	94
3.2.8.10	Time	94
3.2.9	Product Specifications	94
3.2.9.1	Materials	94
3.2.9.2	Design Specifications	95
3.2.9.3	Performance Specifications	95
3.2.10	Design for Service Life and Service Conditions	96
3.2.11	The Hazards of Simultaneous Service Factors	97
3.2.12	Brittle Fracture—A Balancing Act of Design and Material ..	97
3.2.12.1	The Ductile to Brittle Transition	98
3.2.12.2	Molecular Weight (MW) and Brittle Fracture	100
3.2.13	Comparison of Plastics and Metals	100
3.2.14	Crack Phenomena in Fracture	101
3.2.15	Failure by Fatigue	104
3.2.15.1	Fatigue Failure by Crack Propagation	104
3.2.15.2	Failure by Softening Due to Hysteretic Heating	106
3.2.15.3	Effect of Environment	108
3.2.16	Failure by Creep	110
3.2.16.1	Fundamentals of Creep Behavior	110
3.2.16.2	Tests to Predict Creep Behavior	111
3.2.16.3	A Case Study of Creep Failure	112
3.2.16.4	Creep Failure of a Thermoset Polymer	116
3.2.17	Failure by Impact	117
3.2.17.1	Design Effects	117
3.2.17.1.1	Case Study of a Design Failure	119
3.2.17.2	Material Effects	120
3.2.17.3	Molding Effects	121
3.2.17.4	Molecular Weight (MW) Effects	121

3.2.17.5	Polymer Composition and Crystallinity Effects.....	122
3.2.18	Electrical Stress	122
3.2.19	Surface Effects in Failures Related to Design.....	122
3.2.20	Weld Lines	123
3.2.20.1	Examples of Weld Line Failures and Effects.....	126
3.2.20.1.1	Case Studies of Weld Line Failures.....	128
3.2.21	Warpage	132
3.3	Lessons.....	135
3.4	References.....	137
4	Examples of Failure Due to Design and Material Selection.....	141
4.1	Introduction	141
4.2	Part or Product Design	144
4.2.1	Examples of Failure Due to Design and/or Material	144
4.2.1.1	Mold Design Problems	144
4.2.1.1.1	The Replacement New Mold that Failed	144
4.2.1.1.2	Fracture of Ultrasonically Welded ABS Part Due to Mold Design Problem	145
4.2.1.1.3	Fracture of Plastic Parts in Water Service Due to a Mold Problem	146
4.2.1.2	Water Service Failures Not Related to a Mold Problem... ..	149
4.2.1.2.1	Fracture of a Toilet Connector Nut at an Abrupt Wall Thickness Change	149
4.2.1.2.2	How to Turn a Threaded Part Inside Out	152
4.2.1.2.3	Toilet Valve Design	153
4.2.1.2.4	Water Filter Design	155
4.2.1.2.5	Elbow Coupling Design	158
4.2.1.2.6	Plastic Failure Because of a Metal Failure	159
4.2.1.3	Processing-Related Failure Due to Design.....	162
4.2.1.3.1	Spin Welding of a Water Filter	162
4.2.1.3.2	A War-Material Process Problem	163
4.2.1.4	Failure Due to a Metal Component of a Part.....	163
4.2.1.4.1	Plastic Over Metal—The Fractured Kitchen Blender	163
4.2.1.4.2	Metal Inserts	164
4.2.1.5	Design Based on Metal Design—Bad News	166
4.2.1.6	Attachment Stresses—Fracture of Bosses Attaching Motor Housing to Lawnmower	167
4.2.1.7	Failure Due to Static Load Imposed by Screws and Rivets	167
4.2.1.7.1	Cracks at Molded-In Holes.....	168
4.2.1.7.2	Cracks at Screw Holes Drilled into Plastic Sheet	169

4.2.1.8	Stress Concentration at a Weak Point	170
4.2.1.8.1	Weld Lines	170
4.2.1.8.1.1	Fracture of ABS Syringe Needle Holder with Flats Close to Weld Lines	171
4.2.1.8.2	Externally Applied Stress	172
4.2.1.8.2.1	Failure to Consider Occasional Impact in Design of Umbrella	172
4.2.1.8.2.2	Fracture at Gate of PP Antiperspirant Bottle Cap Located at High Stress Location Where Cap is Tightened	172
4.2.1.8.2.3	Microwave Oven Door Handle Screw Located at Point of High Stress When Door is Opened	173
4.2.1.8.3	Internal Stress Due to Design	173
4.2.1.8.3.1	Poor Design and Stress Concentrations in Automobile Coolant Reservoir Tank	173
4.2.1.8.3.2	Stresses in Interference Fit—Fracture of Nylon Head Harness Inside Hard Hat	174
4.2.1.9	Poor Design	175
4.2.1.9.1	Multiple Modes of Failure of a Poorly Designed PS Pitcher	175
4.2.1.9.2	Flexible Hinges Require Special Design— Polyethylene Soap Dish	176
4.2.1.9.3	Fracture of Pultruded E-Glass Rod Due to Retention of Atmospheric Liquid in Cuplike Design of Metal End Fitting	177
4.2.1.10	Problems of Design Diagrams	177
4.2.1.10.1	Misleading or Unwise Instructions in Design Diagrams ..	177
4.2.1.10.2	Make Dimensional Specifications Realistic—The Overspecified Part	177
4.2.1.11	Warpage	177
4.2.1.12	Failure to Allow for Contraction of PBT Part Due to Thermal Aging	179
4.3	Failures of Various Types of Plastics	180
4.3.1	Flexible Polyvinyl Chloride (PVC)	180
4.3.1.1	Fracture or Tearing Due to Flexural Fatigue	180
4.3.1.2	Failure in the Flexible Sheet Itself	180
4.3.1.3	Failure in Products with Attached Parts	181
4.3.2	Rigid PVC	183
4.3.2.1	Pipes and Fittings	183
4.3.2.2	Failure Due to Excessive Heating in Service	183
4.3.2.3	Failure of PVC Container	183
4.3.3	Styrenics—PS, Impact PS (HIPS), ABS, SAN	185

4.3.3.1	PS Homopolymer	185
4.3.3.2	HIPS	187
4.3.3.2.1	How Not to Design a Plastic Parking Permit	189
4.3.3.3	ABS—Acrylonitrile Butadiene Styrene Terpolymer	191
4.3.3.4	SAN—Styrene Acrylonitrile Copolymer	192
4.3.4	Polyolefins	193
4.3.5	Polyethylene PE	195
4.3.5.1	Two Stresses Applied Simultaneously	195
4.3.5.2	Environmental Stress-Cracking	195
4.3.5.2.1	Stress-Cracking of Water Pail	195
4.3.5.2.2	Aerators in Sewage Treatment Lagoon	195
4.3.5.2.3	Drop Impact Bottle Fracture	196
4.3.5.2.4	Fracture of Hair Cream Screw Cap	196
4.3.5.2.5	Fracture of Lawnmower Belt Cover Hold-Down Tab	197
4.3.5.2.6	Extensive Cracking of a Medium Density Polyethylene Cover	197
4.3.5.3	Electrical Water Treeing	198
4.3.5.4	Service Beyond Design Limits	198
4.3.5.5	Design and/or Material Selection	198
4.3.5.6	Oxidative Degradation	200
4.3.5.6.1	Cracked Barrel Cover	201
4.3.5.6.2	Flashlight On-Off Switch	201
4.3.5.6.3	Falling Houseplant Leaves	201
4.3.6	Polypropylene	205
4.3.6.1	Shrinkage Out of Control Due to Colorant	205
4.3.6.2	The Tilted Pancake Syrup Bottle	205
4.3.6.3	Broken Hair Curlers	206
4.3.6.4	Fracture of PP Fibers in Artificial Stadium Grass	206
4.3.6.5	Failure of TV Cabinets During Transport	206
4.3.6.6	Polypropylene Parts Made Brittle by Too Much Colorant	206
4.3.7	Ethylene Copolymers	209
4.3.8	Thermoplastic Engineering Resins that Failed Because T_g Was Too Low for the Service Requirements or Due to Creep—PBT (Polybutylene Terephthalate), PPO (Polyphenylene Oxide), PPS (Polyphenylene Sulfide), and Other Thermoplastics	210
4.3.8.1	Examples of Thermoplastics Failures	211
4.3.9	Cellulosics	212
4.3.9.1	The Showerhead Made with Cellulose Acetate Scrap Resin	212
4.3.10	Acrylics (PMMA)	213

4.3.11	Nylon	213
4.3.11.1	Nylon in Automobile Flipper Covers.....	213
4.3.11.2	Nylon Floor Polisher Gear	213
4.3.11.3	Nylon Hinge Cams	214
4.3.12	Rubber.....	216
4.3.12.1	Examples of Rubber Failure	216
4.4	Unexpected and Unauthorized Problems of Material Selection	219
4.4.1	Unintentional Errors in Formulation or Processing.....	220
4.4.2	Unintentional Variability of Lot to Lot Polymer Coating Acceptability	220
4.4.3	Unexpected Low Adhesion of Coextruded Film	221
4.4.4	Change of Plasticizer Without Authorization	221
4.5	Environmental, Recycling, and Health Aspects of Plastics Failure ..	221
4.6	Lessons.....	222
4.6.1	Failures Due Mainly to Design.....	222
4.6.2	Failures Due to Part Design and/or Material Selection... ..	224
4.7	References.....	229
5	Processing-Related Factors in Failure	233
5.1	Introduction	233
5.2	Test Methods to Evaluate a Polymer's Heat Stability as a Precursor to a Polymer's Selection for a Product	234
5.2.1	Thermogravimetric Analysis (TGA)	235
5.2.2	Differential Scanning Calorimetry (DSC)	235
5.2.3	Melt Index (Melt Flow Rate) ASTM D1238.....	236
5.3	Factors and Variables Common to Processing Methods in General..	236
5.3.1	Intentional and Unintentional Steps in Processing	236
5.3.2	Other Causes of Failure Due to Processing.....	238
5.4	Compounding and Mixing	242
5.5	Fusion.....	245
5.6	Processing Methods.....	245
5.6.1	Injection Molding.....	245
5.6.2	Extrusion	251
5.6.3	Thermoforming Plastic Film and Sheet	253
5.6.4	Blow Molding.....	256
5.6.5	Rotational Molding.....	257
5.7	Improvements in Processing Methods	257
5.8	Process Control Methods, Troubleshooting, Failure Analysis, and Test Methods	258
5.8.1	Process Control Methods.....	258
5.8.2	Troubleshooting and Failure Analysis	258

5.8.3	Test Methods	262
5.9	Secondary Operations	264
5.9.1	Welding Methods	264
5.9.2	Punching	268
5.9.3	Painting and Decorating	268
5.9.4	Surface Smoothing by Buffing	269
5.10	Failure Problems Related to Transportation and Installation	269
5.11	Lessons	273
5.11.1	General	273
5.11.2	Compounding, Fusion, and Dispersion	274
5.11.3	Primary Processing	274
5.11.4	Secondary Operations	275
5.11.5	Testing, Quality Control, and Failure Analysis	275
5.11.6	Transportation, Storage, and Installation	275
5.12	References	276
6	Failure Related to Service Conditions	279
6.1	Introduction	279
6.2	General Nature and Principles of Service Condition-Related Failure	280
6.3	Specific Effects and Examples of Service Conditions	283
6.3.1	Chemical and Solvent Resistance	283
6.3.1.1	Chemical Reactions	286
6.3.1.2	Failures Due to Physical Effects in Chemical and Solvent Resistance in the Absence of Stress	292
6.3.1.3	Chemical Resistance in the Presence of Stress—Environmental Stress-Cracking (ESC) and Stress Corrosion Cracking (SCC)	294
6.3.1.4	Application Areas with Major Effects on Chemical-Related Failure	295
6.3.1.5	Air Pollution	297
6.3.2	Weathering Effects (Outdoor Aging)	298
6.3.3	Physical Effects of Thermal Conditions in Service	300
6.3.4	Plastics in Building Materials	302
6.3.5	Failure Due to Dimensionally Unstable Nature of the Environment of Plastic Products	306
6.3.6	Mechanical Effects—Wear and Impact	306
6.3.7	Biological and Medical	308
6.3.8	Electrical	308
6.3.9	Failures Due to Unintentional and Unanticipated Service Conditions	309

6.4	Lessons.....	314
6.4.1	General Considerations	314
6.4.2	Thermal Effects Including Expansion and Contraction ..	315
6.4.3	Degradation by Chemical Reaction.....	316
6.4.4	Chemical and Solvent Effects other than Chemical Reaction.....	317
6.4.5	Mechanical Effects.....	317
6.4.6	Electrical Effects.....	318
6.4.7	Unintentional and Unexpected Service Conditions	318
6.5	References.....	319
7	Failure Analysis and Test Procedures.....	321
7.1	Basic Considerations	321
7.2	Failure Analysis General Procedures	323
7.2.1	Types of Information Needed	323
7.2.1.1	Visual Examination and Noninvasive X-Ray Imaging....	323
7.2.1.2	History and Circumstances of Failure	323
7.2.1.3	Identification of the Product Source and Plastic Type, Grade, and Source	324
7.2.1.4	Did Failed Product Meet All Specifications as Produced?	324
7.2.1.5	Fractography	324
7.2.1.6	Stress Evaluation or Analysis.....	324

16.5.1	ABS (Acrylonitrile/Butadiene/Styrene)	794
16.5.2	Formaldehyde Condensation Polymers	795
16.6	Plasticized PVC Baby Toys and Medical Products	795
16.7	Chinese Toys	796
16.8	Monomer, Additive, and Degradation Aspects of Food Packaging ...	796

16.8.1	Unpolymerized Monomer	797
16.8.2	Polystyrene.....	797
16.8.2.1	Differing Opinions of Environmental and PS Industry Groups on Health Hazards	797
16.8.2.2	Foam Polystyrene.....	798
16.8.3	The FDA Position on Microwave Food Applications of Plastics	798
16.8.4	The FDA Position on DEHA Plasticizer (Diethylhexyl Adipate) and Dioxins.....	799
16.8.4.1	The Position of Consumer Groups on DEHA in PVC Cling Wraps.....	799
16.8.5	British Studies of Styrene, Benzene, and Other Materials in Plastics Packaging and Foods	800
16.8.6	Teflon-Polytetrafluoroethylene	800
16.9	Pollution of Oceans and Waterways by Discarded Plastic Waste	800
16.10	Lessons for Environmental, Recycling, and Health Aspects of Plastics Failure.....	803
16.11	References.....	805
