<i>Preface</i>	<i>xvii</i>
<i>About the author</i>	<i>xix</i>
1 Introduction and case study	1
General introduction	1
Space and knowledge	4
Dimensions of knowledge	6
Knowledge representation	10
A case study in socio-spatial change	13
Overview of the book	17
Notes	22
2 Innovation, agency and technology	23
Spatializing knowledge	25
Space and innovation	27
Knowledge as technology	29
Knowledge as innovation	31
Patterns of innovation	34
Space, knowledge and power	38
Conclusion	40
Note	40
3 The dynamics of innovation	41
The social life of innovation	43

Regional dynamics	45
Complexity and modularity	48
Patterns of adoption	49
Flows	52
Waves	54
Bifurcations	57
Criticality	59
Conclusion	62
Notes	63
4 Modelling knowledge dynamics	65
Information and knowledge	67
Ecologies of innovation	70
Ecologies of human development	72
Network dynamics	74
Network graphs	76
Innovation networks	79
The topology of regional knowledge	82
System dynamics of innovations	83
Conclusion	86
Notes	88
5 Modelling socio-spatial agents	89
Agency and action	90
Manifolds and mess	93
Elements of agent behaviour	94
Agency and autonomy	97
Coalitions and decisions	99
Resource allocation	104
Search and decision-making	107
Modelling with games	108

Conclusion	110
Notes	111
6 Case studies in socio-spatial change	113
Micro-level socio-spatial change: slum sanitation	115
Micro-level change agents	117
Meso-level socio-spatial change: remote long-term care services	118
Socio-spatial inclusion and mobile platforms	119
Meso-level knowledge integration	121
Exo-level socio-spatial change: Arctic urbanization	122
Exo-level instability and infrastructure	124
Agency and adaptation	125
Dilemmas and homophily	128
Bidding and voting	131
Knowledge systems	134
Conclusion	138
Notes	139
7 Reasoning with graphs	141
Representing knowledge flows	142
Visualization as science and art	143
Visualizations as thought experiments	144
Drawing relationships	146
Logic, symbols and computing	147
Computing for simulation	151
Community models	154
Spatial distance functions	155
Complex data modelling	162
Spatial data structures	165
Surface-network analysis	169
Conclusion	172
Notes	174

8	Decisions and arguments	175
	Constructing knowledge	176
	Decisions and representation	179
	Experience and arguments	183
	Basics of argumentation	184
	Argumentation schemes	186
	Deriving arguments	188
	Applying argumentation	196
	Conclusion	198
	Notes	199
9	Directions for adaptive planning	201
	Principles of adaptation	203
	Adaptation in human systems	204
	Managing knowledge complexity	206
	Directions for planning	209
	Directions for research	212
	Planning with implicit knowledge	215
	Calibrating models	217
	General summary	219
	General conclusions	224
	Notes	227
	Glossary	229
	Sources for socio-spatial argumentation	235
	Bibliography	241
	Index	255
