

Adhesives Technology Handbook

Third Edition

**Sina Ebnesajjad
Arthur H. Landrock**

Contents

Preface to Third Edition	xvii
Preface to Second Edition	xix
Acknowledgments	xxi
1. Introduction and Adhesion Theories	
1.1 Definition of Adhesives and Adhesive Bonding	1
1.2 Functions of Adhesives	2
1.3 Classification of Adhesives	3
1.4 Advantages and Disadvantages of Joining Using Adhesives	3
1.4.1 Advantages	3
1.4.2 Disadvantages	4
1.5 Requirements of a Good Bond	4
1.5.1 Proper Choice of Adhesive	4
1.5.2 Good Joint Design	4
1.5.3 Cleanliness	5
1.5.4 Wetting	5
1.5.5 Adhesive Bonding Process	5
1.6 Introduction to Theories of Adhesion	5
1.6.1 Mechanical Theory	7
1.6.2 Electrostatic (Contact Charging) Theory	8
1.6.3 Diffusion Theory	8
1.6.4 Wetting Theory	9
1.6.5 Chemical Bonding	10
1.6.6 Weak Boundary Layer Theory	13
1.7 Definition of Failure Modes	13
1.8 Mechanisms of Bond Failure	16
References	17
2. Surface Tension and Its Measurement	
2.1 Introduction	19
2.2 What Is an Interface?	19
2.3 Surface Tension	19
2.4 Surface Free Energy	20
2.4.1 Surface Energy of Solids	22
2.4.2 Work of Adhesion	22
2.5 Contact Angle (Young's Equation)	23

2.6	Effect of Temperature on Surface Tension	25
2.7	Surface Tension Measurement	26
2.7.1	Measurement for Liquids: du Nouy Ring and Wilhelmy Plate Methods	27
2.7.2	Measurement for Solids: Liquid Homolog Series	29
	References	34
3.	Material Surface Preparation Techniques	
3.1	Introduction	35
3.2	General Considerations	35
3.3	Surface Treatment of Metals	36
3.4	Cleaning (Degreasing) Metals	39
3.4.1	General Sequence of Cleaning	39
3.5	Priming	46
3.6	Sol-Gel Process	46
3.7	Surface Treatment of Plastics	48
3.7.1	Effect of Treatment on Plastic Surfaces	48
3.7.2	Surface Cleaning	51
3.7.3	Mechanical Treatment (Surface Roughening)	51
3.7.4	Corona Treatment	51
3.7.5	Flame Treatment	56
3.8	Methods for Evaluating Effectiveness of Surface Preparation	61
3.8.1	Dyne Liquids	61
3.8.2	Water-Break Test	61
3.8.3	Contact-Angle Test	61
3.9	Surface Exposure Time	62
	References	65
4.	Classification of Adhesives and Compounds	
4.1	Introduction	67
4.2	Adhesive Composition Formulation	67
4.2.1	Adhesive Base or Binder	67
4.2.2	Hardener (for Thermosetting Adhesives)	67
4.2.3	Solvents	68
4.2.4	Diluents	68
4.2.5	Fillers	68
4.2.6	Carriers or Reinforcements	68
4.2.7	Other Additives	68
4.3	Classification of Adhesives	69
4.3.1	Source: Natural vs. Synthetic Adhesives	69
4.3.2	Classification by Chemical Composition	71
4.3.3	Classification by Function	73
4.3.4	Classification by Physical Form	74
4.3.5	Classification by Mode of Application and Setting	75
4.3.6	Classification by Specific Adherends or Applications	75
4.3.7	Society of Manufacturing Engineers Classification	77

4.3.8	Classification by Rayner	79
4.3.9	Additional Classification	81
4.4	Other Classifications	82
4.4.1	By the Type of Cure That Occurs in the Adhesive	82
4.4.2	By the Mechanical Properties of Adhesives	82
4.4.3	By the Number of Packages or Components Needed to Produce the Solidification or Curing of the Adhesive	83
	References	83

5. Characteristics of Adhesive Materials

5.1	Acrylics	85
5.2	Allyl Diglycol Carbonate (CR-39)	86
5.3	Alloyed or Modified (Two-Polymer) Adhesives	86
5.4	Anaerobic Adhesives/Sealants	91
5.5	Aromatic Polymer Adhesives (Polyaromatics)	93
5.6	Asphalt	94
5.7	Butyl Rubber Adhesives	95
5.8	Cellulose Ester Adhesives	95
5.9	Cellulose Ether Adhesives	100
5.10	Conductive Adhesives	102
5.10.1	Electrically Conductive Adhesives (Chip-Bonding Adhesives)	102
5.10.2	Thermally Conductive Adhesives	103
5.11	Cyanoacrylate Adhesives	105
5.12	Delayed-Tack Adhesives	108
5.13	Elastomeric Adhesives	109
5.14	Epoxy Adhesives	110
5.14.1	Hardening Agents for Epoxy Adhesives	111
5.15	Epoxy-Phenolic Adhesives	112
5.16	Epoxy-Polysulfide Adhesives	113
5.17	Film and Tape Adhesives	113
5.18	Furane Adhesives	116
5.19	Hot-Melt Adhesives	117
5.19.1	Foamable Hot-Melt Adhesives	118
5.19.2	Ethylene-Vinyl Acetate (EVA) and Polyolefin Resins	118
5.19.3	Polyamide (Nylon) and Polyester Resins	119
5.19.4	Other Hot-Melt Adhesives	119
5.20	Inorganic Adhesives (Cements)	120
5.20.1	Soluble Silicates (Potassium and Sodium Silicate)	121
5.20.2	Phosphate Cements	122
5.20.3	Basic Salts (Sorel Cements)	122
5.20.4	Litharge Cements	122
5.20.5	Sulfur Cements	122
5.20.6	Sauereisen's Adhesives	123
5.21	Melamine-Formaldehyde Adhesives (Melamines)	123
5.22	Microencapsulated Adhesives	123

5.23	Natural Glues	124
5.23.1	Vegetable Glues	124
5.23.2	Glues of Animal Origin	126
5.24	Neoprene (Polychloroprene) Adhesives	128
5.25	Neoprene-Phenolic Adhesives	129
5.26	Nitrile-Epoxy (Elastomer-Epoxy) Adhesives	129
5.27	Nitrile-Phenolic Adhesives	130
5.28	Nitrile Rubber Adhesive	130
5.29	Nylon Adhesives	131
5.30	Nylon-Epoxy Adhesives	131
5.31	Phenolic Adhesives	131
5.31.1	Acid-Catalyzed Phenolics	132
5.31.2	Hot-Setting Phenolics	133
5.32	Phenoxy Adhesives	133
5.33	PBI Adhesives	135
5.34	Polyester Adhesives	135
5.35	PI Adhesives	136
5.36	Polyisobutylene Adhesives	136
5.37	Polystyrene Adhesives	137
5.38	Polysulfides (Thiokols)	138
5.39	Polysulfone Adhesives	138
5.40	Polyurethane Adhesives	140
5.41	Polyvinyl Acetal Adhesives	140
5.42	Polyvinyl Acetate Adhesives	141
5.43	Polyvinyl Alcohol Adhesives	141
5.44	Polyvinyl Butyral Adhesives	141
5.45	Premixed Frozen Adhesives	142
5.46	Pressure-Sensitive Adhesives	143
5.47	Resorcinol-Formaldehyde Adhesives	143
5.48	Rubber-Based Adhesives	143
5.48.1	Silicone Adhesives	146
5.49	Solvent-Based Systems	147
5.50	Thermoplastic Resin Adhesives	148
5.51	Thermoplastic Rubber (for Use in Adhesives)	149
5.52	Thermosetting Resin Adhesives	149
5.53	UV-Curing Adhesives	150
5.54	Urea-Formaldehyde Adhesives (Ureas)	151
5.55	Vinyl-Epoxy Adhesives	151
5.56	Vinyl-Phenolic Adhesives	151
5.57	Polyvinyl Formal-Phenolics	152
5.58	Polyvinyl Butyral-Phenolics	152
5.59	Vinyl-Resin Adhesives	152
5.60	Water-Based Adhesives	154
	References	

6. Adhesives for Special Adherends

6.1 Introduction

6.2 Metals	160
6.2.1 Aluminum and Alloys	160
6.2.2 Beryllium	162
6.2.3 Brass and Bronze	163
6.2.4 Cadmium (Plated on Steel)	163
6.2.5 Copper and Copper Alloys	164
6.2.6 Gold	164
6.2.7 Lead	164
6.2.8 Magnesium and Magnesium Alloys	164
6.2.9 Nickel and Nickel Alloys	165
6.2.10 Plated Metals	165
6.2.11 Platinum	166
6.2.12 Silver	166
6.2.13 Steel, Mild, Carbon (Iron)	166
6.2.14 Stainless Steel	166
6.2.15 Tin	166
6.2.16 Titanium and Titanium Alloys	166
6.2.17 Tungsten and Tungsten Alloys	167
6.2.18 Uranium	167
6.2.19 Zinc and Zinc Alloys	167
6.3 Thermoplastics	168
6.3.1 Acetal Copolymer	168
6.3.2 Acetal Homopolymer	169
6.3.3 Acrylonitrile-Butadiene-Styrene	169
6.3.4 Cellulosics	169
6.3.5 Ethylene-Chlorotrifluoroethylene	170
6.3.6 Fluorinated-Ethylene Propylene (Teflon [®])	170
6.3.7 Fluoroplastics	170
6.3.8 Ionomer (Surlyn [®])	170
6.3.9 Nylons (Polyamides)	170
6.3.10 Perfluoroalkoxy Resins	170
6.3.11 Phenylene-Oxide-Based Resins (Noryl [®])	170
6.3.12 Polyaryl Ether (Arylon T)	171
6.3.13 Polyaryl Sulfone (Astrel 360; 3M Co.)	171
6.3.14 Polycarbonate	171
6.3.15 Polychlorotrifluoroethylene (Aclar [®])	171
6.3.16 Polyester (Thermoplastic Polyester)	172
6.3.17 Polyetheretherketone	172
6.3.18 Polyetherimide (ULTEM [®])	172
6.3.19 Polyethersulfone	172
6.3.20 Polyethylene	172
6.3.21 Polymethylmethacrylate	173
6.3.22 Polymethylpentene (TPX [®] by Mitsui Chemicals Co.)	173
6.3.23 Polyphenylene Sulfide (Ryton [®])	173
6.3.24 Polypropylene	173
6.3.25 Polystyrene	173
6.3.26 Polysulfone	173
6.3.27 Polytetrafluoroethylene (Teflon [®])	174

6.3.28	Polyvinyl Chloride (PVC)	174
6.3.29	Polyvinyl Fluoride (Tedlar [®])	174
6.3.30	Polyvinylidene Fluoride (Kynar [®])	174
6.3.31	Styrene-Acrylonitrile (Lustran [®])	175
6.4	Thermosetting Plastics (Thermosets)	175
6.4.1	Diallyl Phthalate	175
6.4.2	Epoxies	175
6.4.3	Melamine-Formaldehyde (Melamines)	176
6.4.4	Phenol-Formaldehyde (Phenolics)	176
6.4.5	Polyester (Thermosetting Polyester)	176
6.4.6	Polyimide	176
6.4.7	Polyurethane	176
6.4.8	Silicone Resins	176
6.4.9	Urea-Formaldehyde	176
6.5	Reinforced Plastics/Composites	177
6.6	Plastic Foams	178
6.7	Rubbers (Elastomers)	179
6.8	Ceramics and Glass	180
	References	180
7.	Joint Design	
7.1	Basic Principles	183
7.2	Types of Stress	183
7.2.1	Compression	184
7.2.2	Shear	184
7.2.3	Tension	185
7.2.4	Peel	185
7.2.5	Cleavage	185
7.3	Methods of Improving Joint Efficiency	185
7.4	Joint Design Criteria	187
7.5	Typical Joint Designs	189
7.6	Peeling of Adhesive Joints	191
7.7	Stiffening Joints	192
7.8	Cylindrical Joints	192
7.9	Angle and Corner Joints	194
7.10	Joints for Plastics and Elastomers	194
7.10.1	Flexible Materials	194
7.10.2	Rigid Plastics	196
7.11	Stress Analysis of Adhesive Joints	196
7.11.1	Theoretical Analysis of Stresses and Strains	196
7.11.2	Experimental Analyses	197
7.11.3	Failure Analyses	201
7.11.4	Methods of Stress Analysis	202
7.12	Optimizing Adhesive Bonding Through Joint Design—A Practical Approach	203
	References	204

8. Adhesive Applications and Bonding Processes	
8.1 Introduction	206
8.2 Adhesive	206
8.2.1 Storage	206
8.3 Adhesive Preparation	207
8.4 Adhesive Dispensers	209
8.4.1 Small-Portion Mixer Dispensers	209
8.5 Methods of Adhesive Application	210
8.5.1 Liquid Adhesives	210
8.5.2 Pastes	214
8.5.3 Powders	215
8.5.4 Films	216
8.5.5 Hot Melts	216
8.6 Joint-Assembly Methods	218
8.6.1 Wet Assembly	218
8.6.2 Pressure-Sensitive and Contact Bonding	219
8.6.3 Solvent Activation	219
8.6.4 Heat Activation	219
8.7 Curing	220
8.8 Bonding Equipment	220
8.8.1 Pressure Equipment	220
8.8.2 Heating Equipment	222
8.8.3 Ultrasonic Activation	226
8.8.4 Adhesive Thickness	227
8.9 Weldbonding	227
8.9.1 Weldbond Configuration	228
8.9.2 Surface Preparation	230
8.9.3 Adhesive Choice	230
8.9.4 Tooling for Weldbonding	231
8.9.5 Weldbonding Techniques	232
References	232
9. Solvent Cementing of Plastics	
9.1 Introduction	235
9.2 Background	235
9.2.1 Solubility Parameter	236
9.2.2 Factors Affecting Adhesive and Solvent Bonding	237
9.3 Solvents for Specific Polymers	241
9.3.1 Acetal Copolymer	241
9.3.2 Acetal Homopolymer	243
9.3.3 Acrylonitrile-Butadiene-Styrene	243
9.3.4 Cellulosics	243
9.3.5 Nylons (Polyamides)	246
9.3.6 Polycarbonate	247
9.3.7 Polystyrene	247
9.3.8 Styrene-Acrylonitrile	249

9.3.9	Polysulfone	249
9.3.10	Polybutylene Terephthalate (Valox [®])	249
9.3.11	Polymethyl Methacrylate	249
9.3.12	Phenylene Oxide-Based Resins (Noryl [®])	250
9.3.13	Polyvinyl Chloride	252
9.3.14	Chlorinated Polyvinyl Chloride	254
9.3.15	Polyetherimide (Utem [®])	254
9.4	Solvent Cementing—A Commercial Perspective	254
	References	256
10.	Adhesives for Medical and Dental Applications	
10.1	Introduction	258
10.2	Natural Adhesives	259
10.3	Synthetic and Semisynthetic Adhesives	259
10.4	Cyanoacrylic Adhesives	259
10.4.1	Medical Grade Cyanoacrylate Adhesives	263
10.4.2	Commercial Grades of Cyanoacrylate Tissue Adhesives	266
10.5	Test Methods to Characterize Strength of Tissue Adhesives	269
10.6	Medical and Dental Applications of Adhesives	269
10.6.1	Adhesives for Skin Closure	271
10.6.2	Case Studies of Tissue Adhesives	272
10.7	Bone Adhesives	283
10.8	Dental Applications of Adhesives	284
10.8.1	Methacrylic Acid	286
10.8.2	Methyl Methacrylate	286
10.8.3	Hydroxy Ethyl Methacrylate	288
10.8.4	4-Methacryloyloxyethyl Trimellitic Acid	288
10.8.5	4-Acryloyloxyethyl Trimellitate Anhydride	289
10.8.6	10-Methacryloyloxydecyl Dihydrogen Phosphate	289
10.8.7	Other Monomers	289
	References	289
11.	Durability of Adhesive Bonds	
11.1	Introduction	297
11.2	High Temperature	299
11.2.1	Epoxies	300
11.2.2	Modified Phenolics	300
11.2.3	Polysulfone	301
11.2.4	Silicones	302
11.2.5	Polyaromatics	302
11.3	Low and Cryogenic Temperatures	303
11.4	Humidity and Water Immersion	305
11.4.1	Effects of Surface Preparation on Moisture Exposure	306
11.4.2	Stressed Temperature/Humidity Test	308
11.4.3	Hot-Water-Soak Test	308
11.4.4	Fatigue-Life Data	311

11.5	Saltwater and Salt Spray	312
11.5.1	Seacoast Weathering Environment	313
11.5.2	Saltwater Immersion	315
11.5.3	Boeing/Air Force Studies on Salt-Spray Effects	316
11.6	Weathering	317
11.6.1	Simulated Weathering/Accelerated Testing	317
11.6.2	Outdoor Weathering (Picatinny Arsenal Studies)	317
11.7	Chemicals and Solvents	326
11.8	Vacuum	327
11.9	Radiation	329
11.10	Biological Organisms	333
11.11	Test Methods	334
11.12	Adhesive Bond Durability—A Commercial Perspective	334
	References	336
12.	Testing of Adhesive Bonds	
12.1	Introduction	339
12.2	Tensile	339
12.3	Shear	340
12.4	Peel	341
12.5	Cleavage	342
12.6	Creep	342
12.7	Fatigue	343
12.8	Impact	343
12.9	Durability	343
