

Psychosocial
Interventions
for
Genetically
Influenced
Problems
in Childhood
and Adolescence

Preface ix

Acknowledgments xiii

- 1 Prelude: Great Expectations 1**
Aren't Magic Bullets Possible? 10
So Aren't Similar Successes Imminent? 11
What Will be the Yield of Genetic Research in Terms
of Intervention? 14
Where Will All of This Lead? 17
- 2 Autism Spectrum Disorder: Can We Use
Environmental Intervention to Reprogram
Genetic Effects? 21**
Genomic Approaches to ASD 24
Is There a New Fundamental Etiological Model of
ASD? 27
Genomics, Complex Disorders, Hype, and Hope 30
Using the Environment to Reprogram the Effects
of Genes 34
What's Next? 41
References 44

- 3 Attention-Deficit/Hyperactivity Disorder and Reading Disorder: Illuminating How the Environment Shapes Highly Heritable Disorders** 45
- Genetic Models of ADHD and RD: Why Has Gene Discovery Been So Elusive? 47
- Why Would the Environment be Important for Highly Heritable Disorders? 51
- More Nuanced Models of Gene-Environment Interplay for ADHD and RD 54
- The Promise of Psychosocial Interventions 59
- Concluding Remarks 66
- References 67
- 4 Conduct Problems and Substance Use: The Underappreciated Role of Shared Environmental Influences** 69
- Genetic Models of CP and SU 73
- The Impact of Shared Environmental Influences 75
- Getting Molecular About the Environment 81
- A Developmental Gene-Environment Model 86
- Family-Based Interventions and Genetic Epidemiology 90
- Summary and Looking Ahead 95
- References 96
- 5 Depression: The Importance of the Family as a Context for Gene Expression** 99
- High-Risk Studies of Offspring of Depressed Parents 101
- Genetic Models of MDD 104

- GxE Interaction and Depression 108
Depression in Adolescents and Children 112
Who Should be Treated in Families at Risk? 116
Implications of the Parental Treatment
Studies 120
References 124
- 6 Pediatric Bipolar Disorder: Complex Phenotypes,
Genotypes, and Environments 127**
Current Thinking on the Genetics of BP 128
Is PBD an Early Manifestation of Genetic
Risk to BP? 130
The Clinical Complexity of PBD 138
Emphasizing Psychosocial Interventions
for PBD 143
Conclusions 148
References 150
- 7 Pediatric Anxiety Disorders: The Intersection of
Genes and Environments 153**
The Heterogeneity of Anxiety Disorders:
Focusing on Anxiety-Related Behaviors
in Childhood and Adolescence 154
Anxiety in the Family: The Intersection of Genes
and Parenting 164
Genes, Environment, and Anxiety: Newer
Methodologies 168
Concluding Remarks 174
References 177

8 The Future: Why Psychosocial Intervention Will Matter Even More	179
Future Genetic Research and the Conceptualization of Disorders	183
Genomics May Refine Diagnosis and Point to Tailored Interventions	188
Genomics Will Lead to Earlier Intervention	191
Genomics Will Accelerate the Development of Psychosocial Interventions	193
Will We Discover Magic Bullets?	194
