PREFACE	xiii
<b>1 ENVIRONMENTAL PROBLEMS AND REACTIONS: WHY BOTHER ABOUT THE ENVIRONMENT?</b>	<b>1</b>
<b>1.1 Environmental problems</b>	<b>1</b>
Integrated environmental management	2
Definition of the problem	3
<b>1.2 The global perspective</b>	<b>4</b>
Global warming	4
The carbon cycle	7
Correlations and climate models	7
Effects of global warming	9
Fossil fuel combustion	9
Energy conservation	12
Ozone layer depletion	12
Water pollution	13
Animals and vegetation	14
<b>1.3 Mankind</b>	<b>15</b>
World population	15
Energy and fossil fuel consumption	17
Basic needs	17
Calorie	17
Food and drink	18
<b>1.4 Consumerism</b>	<b>18</b>
Transportation systems	18
Energy and environmental costs of manufacturing systems and products	21
'Throwaway' society	21
Reuse and recycling	22
<b>1.5 Sustainable development</b>	<b>22</b>
Global environmental burden	23
<b>1.6 National responses</b>	<b>23</b>
EC Directives	23

The Fifth European Community Environmental Action Programme	24
UK policy	24
UK legislation and regulations	26
Standards	28
<b>1.7 Considerations for companies</b>	<b>29</b>
<b>2 ENVIRONMENTAL LEGISLATION: WHAT ARE THE REQUIREMENTS OF THE LAW?</b>	<b>33</b>
Acronyms	33
<b>2.1 Environmental law</b>	<b>34</b>
Nuisance and duty of care	34
<b>2.2 EC Directives</b>	<b>34</b>
The First Environmental Action Programme (1973)	35
The Second Environmental Action Programme (1977)	35
The Third Environmental Action Programme (1981)	35
The Fourth Environmental Action Programme (1987)	36
The Fifth Environmental Action Programme (1993)	36
<b>2.3 Chronology</b>	<b>38</b>
<b>2.4 Air pollution</b>	<b>38</b>
<b>2.5 Water pollution</b>	<b>38</b>
<b>2.6 Waste on land</b>	<b>42</b>
<b>2.7 Her Majesty's Inspectorate of Pollution</b>	<b>45</b>
<b>2.8 Environmental Protection Act 1990</b>	<b>45</b>
<b>2.9 Penalties</b>	<b>48</b>
<b>2.10 Application for IPC authorisation</b>	<b>48</b>
<b>2.11 BATNEEC</b>	<b>49</b>
Examples of BATNEEC	53
General BATNEEC	58
<b>APPENDIX 2.1 PRESCRIBED PROCESSES AND SUBSTANCES</b>	<b>64</b>
<b>A2.1 Part A processes</b>	<b>64</b>
The production of fuel and power and associated processes	65
Metal production and processing	66
The chemical industry	69
Waste disposal and recycling	70
Other industries	70
<b>A2.2 Part B processes</b>	<b>71</b>
The production of fuel and power and associated processes	71
Metal production and processing	71
Mineral industries	72
Waste disposal and recycling	73
Other industries	73
Prescribed substances	74

<b>3 ENVIRONMENTAL STANDARDS: GOING GREEN?</b>	<b>77</b>
3.1 The European Union's Eco-management and Audit Scheme (EMAS)	77
3.2 Environmental Management Systems: BS 7750	80
3.3 Ecolabelling	83
<b>4 THE INTEGRATED APPROACH TO ENVIRONMENTAL MANAGEMENT: 12 STEPS TO HEAVEN</b>	<b>87</b>
4.1 Integrated environmental management	87
4.2 Environmental issues	90
General issues	91
Process	91
Substances	92
Services	92
Transportation	93
Energy: inventory and energy accounts	93
Emissions to air	94
Water: inventory and water accounts	95
Discharges to water	96
Materials	96
Waste	97
Other nuisances	98
Nature and ecology	98
Accidents, health and safety	99
Products	99
Packaging	100
Information	101
4.3 Definitions	101
4.4 Essential reference material	106
4.5 The chain: an approach to integrated environmental management	107
Step 1: Education	109
Step 2: Commitment	110
Step 3: Initial review	111
Step 4: Policy	112
Step 5: Organisation	115
Step 6: Compliance	116
Step 7: Scoping study	117
Step 8: Management	118
Step 9: Documentation	119
Step 10: Review	120
Step 11: Options/recommendations	129
Step 12: Audit/report	130

4.6	Validation of the environmental management system	138
	Independent validation	138
4.7	The 39 sequential steps of integrated environmental management	140
5	<b>ENERGY, EMISSIONS TO AIR AND ENERGY MANAGEMENT</b>	
5.1	Fossil Fuels	143
	End uses for fossil fuels	144
5.2	Combustion	148
	Atomic weights	148
	Calorific values	148
	Organic waste	150
	Combustion calculations	151
5.3	Emissions to air	152
	Chronology: energy-related emissions to air	152
	Prescribed substances	152
	The rise of road transport in the UK	159
	Pollution from UK industry	164
	Non-energy-related emissions to air	165
5.4	Energy management procedure	168
	The 39 steps to optimise energy management investments at a site (6)	172
	Energy accounting	173
	Pollution accounting	179
	Energy throughputs	181
	Energy uses and options for improvement	182
	Rules for the efficient conservation of energy	183
	Questions for the client interview	188
	Checklists for energy managers	194
	Best investments	209
	Energy use improvement project	215
6	<b>WATER, EFFLUENTS AND WATER MANAGEMENT</b>	219
6.1	Water supplies	219
	The water cycle	219
6.2	Discharges and effluents to water	221
	Water pollution	221
6.3	Water and the law	222
	Chronology: water and effluents	222
6.4	Water quality	224
	Oxygen levels	224
	Pollutant content	224
	Other properties	224

Emissions to water	231
<b>6.5 Water treatment</b>	<b>234</b>
Drinking water	234
Waste water	236
<b>6.6 The water industry in the UK</b>	<b>237</b>
<b>6.7 Water prices</b>	<b>238</b>
<b>6.8 Uses for water</b>	<b>239</b>
<b>6.9 Water management procedure</b>	<b>239</b>
Water accounting	241
The 39 steps to optimise water management investments at a site	242
Rules for the efficient conservation of water	243
Questions for the client interview	244
Checklists for water managers	246
<b>6.10 Options for water conservation</b>	<b>248</b>
Leakage	248
Water metering	248
Taps	249
Tap flow restrictors	249
Showers and baths	250
Toilets/lavatories	250
Dishwashers and washing machines	251
Rainwater harvesting	251
Grey water recycling	251
<b>6.11 Improvement project</b>	<b>253</b>
<b>7 MATERIALS AND WASTE MANAGEMENT</b>	<b>255</b>
<b>7.1 Materials, products and pollution</b>	<b>255</b>
The 'throwaway' society	256
<b>7.2 Waste and the law</b>	<b>257</b>
Chronology: waste and land pollution	257
Release into land	257
<b>7.3 Waste categories</b>	<b>261</b>
Inert wastes	261
Semi-inert wastes	262
Putrescible wastes	262
Difficult wastes	263
Special wastes	264
Prohibited wastes	265
<b>7.5 Waste arisings</b>	<b>266</b>
<b>7.6 Materials uses and options for improvement</b>	<b>266</b>
Materials and waste accounting	266
Demand side options for cost-effective waste minimisation	267
Energy from waste	270

The 39 steps to optimise waste management investments at a site	274
Rules for the efficient conservation of materials	276
Questions for the client interview	276
Checklists for waste managers	278
Laws of energy and materials flows	280
<b>7.7 Improvement project</b>	<b>281</b>
<b>8 INTEGRATED CASE STUDY: A CORPORATE SITE</b>	<b>283</b>
<b>8.1 Energy and environmental audit, Green Products Ltd.</b>	<b>284</b>
Executive summary	284
<b>8.2 Main report</b>	<b>285</b>
39 steps of integrated environmental management	285
39 steps of energy management	293
39 steps of water management	312
39 steps of waste management	318
Other studies	331
Aire and Calder	331
Project Catalyst	334
<b>9 SUMMARY</b>	<b>335</b>
<b>9.1 Summary</b>	<b>335</b>
<b>9.2 The future</b>	<b>339</b>
<b>TECHNICAL ANNEX: SUMMARY OF FUNDAMENTAL CONCEPTS, RELATIONSHIPS AND EQUATIONS</b>	<b>341</b>
<b>BIBLIOGRAPHY</b>	<b>359</b>
<b>INDEX</b>	<b>363</b>
