

INTERNATIONAL EDITION

Information Technology for Management

7th Edition

Henry C. Lucas, Jr.

CONTENTS

Preface v

Acknowledgments xiii

PART ONE

The Role of Managers in Information Technology

1. USING TECHNOLOGY TO TRANSFORM THE ORGANIZATION	5
The Senior Manager	6
Information Technology in the Workplace	6
A Visit to Brun Passot in France	10
What Is Information Technology?	11
Transforming Organizations	13
Information Technology and the Manager	15

The Challenge of Change 16

Six Major Trends 17

A Preview of the Book 19

2. INTERPRETING AND UNDERSTANDING INFORMATION 25

The Nature of Information 26

What Is Information? 26

How People Interpret Information 26

A Model for Interpreting Information 28

Characteristics of Information 30

From Information to Knowledge 31

The Decision-Making Process 34

Problem Finding and Solving 34

Types of Decisions 34

How Do Individuals Make Decisions? 35

Stages in the Decision-Making Process 35

The Influence of the Organization 38

A Scenario for the Not-Too-Distant
Future 39

3. INFORMATION TECHNOLOGY IN PERSPECTIVE 46

Frameworks for Information Technology	47
<i>Decision-Oriented Frameworks</i>	47
<i>A Synthesized Framework</i>	48
<i>Adding Organizations and Decisions to a Framework</i>	49
A Framework Based on IT	51
<i>Changing Technology and Applications</i>	51
<i>Processing Transactions</i>	51
<i>Decision Support, Executive IS, and Expert Systems</i>	52
<i>Knowledge Work Support</i>	52
<i>Supporting Groups and Cooperative Work-Groupware</i>	52
<i>Interorganizational Systems</i>	53
<i>Key Technologies: Communications, Networking, and Database</i>	53
<i>A More Contemporary Framework</i>	53
The Basics of Information Systems	55
<i>Some Generic Types of Systems</i>	55
<i>Using Different Types of Technology</i>	55
Is There Value in IT?	57
<i>Investment Opportunities Matrix</i>	58
<i>What Is Value?</i>	65
The Case of Chrysler	66

PART TWO

Organizational Issues

4. THE IMPACT OF INFORMATION TECHNOLOGY ON THE ORGANIZATION 75

Modern Organizations	76
<i>Organizational Structure and Design</i>	76
<i>What Is Organizational Flexibility?</i>	78
<i>Impact on Flexibility</i>	79
<i>Information Technology Runs the Airline</i>	79
<i>Co-opting the Travel Agent</i>	81

<i>Technology Transforms the Securities Industry</i>	82
<i>Natural Growth Generates an Impact</i>	83
<i>Conclusions</i>	83

Creating New Types of Organizations	84
<i>Examples of Designs Using IT Variables</i>	86
<i>Adding People to the Design</i>	91
Building a T-Form Organization	94
<i>People in the T-Form</i>	94
<i>Other Design Possibilities</i>	94
<i>Adopting the T-Form: An Example</i>	96

5. STRATEGIC ISSUES OF INFORMATION TECHNOLOGY 104

Information Technology and Corporate Strategy	105
<i>Some Examples of Technology and Strategy</i>	106
<i>The Value Chain</i>	107
<i>Some Generic Strategies</i>	108
<i>A Framework for the Strategic Use of IT</i>	109
<i>Capitalizing on Information Technology</i>	111
Creating and Sustaining a Competitive Edge	112
<i>Using Resources to Advantage</i>	112
<i>Protecting an IT Innovation</i>	113
<i>An Example of Technology for Competitive Advantage</i>	114
Integrating Technology with the Business Environment	116
Managing Information Technology	118
<i>A Vision of the Organization and Technology</i>	119
<i>Technology for Structuring the Organization</i>	119
<i>Integrating Technology and Decision Making</i>	120
<i>A Corporate Plan for Strategy</i>	120
<i>Alliances and Partnerships</i>	121

<i>New IT Initiatives</i>	122
<i>The IT Infrastructure</i>	122
<i>Ongoing Management of IT</i>	123
6. INTERNATIONAL BUSINESS AND INFORMATION TECHNOLOGY	127
The Impact of Globalization on Business	128
International Business Strategies	129
<i>Multinational</i>	130
<i>Global</i>	130
<i>International</i>	130
<i>Transnational</i>	130
Key Issues in an International Environment	130
<i>Information Needs</i>	130
<i>Implementing International IT</i>	131
Managing Information Technology Internationally	134
<i>Concentrate on Interorganizational Linkages</i>	135
<i>Establish Global Systems Development Skills</i>	135
<i>Build an Infrastructure</i>	135
<i>Take Advantage of Liberalized Electronic Communications</i>	136
<i>Strive for Uniform Data</i>	136
<i>Develop Guidelines for Shared versus Local Systems</i>	137
Three Examples	138
<i>Standard Pharmaceuticals International</i>	138
<i>Asea Brown Boveri</i>	139
<i>VeriFone</i>	140
Transnational Virtual Firms and IT	144
Business Models and IT Management	145
<i>Independent Operations</i>	145
<i>Headquarters Driven</i>	146
<i>Intellectual Synergy</i>	147
<i>Integrated Global IT</i>	147
The Internet, Imperialism, and Developing Countries	149

PART THREE**Information Technology**

7. THE FUNDAMENTALS	157
The Components of a Personal Computer	158
<i>Primary Memory or RAM</i>	160
<i>The Arithmetic Basis of Computers</i>	160
<i>How Memory Is Organized</i>	162
<i>Memory Technology</i>	163
<i>The Central Processing Unit</i>	164
<i>Doing Arithmetic</i>	165
<i>How Does the CPU Work?</i>	165
<i>An Instruction Set</i>	167
CISC versus RISC	167
What Makes a Chip Perform?	169
<i>What Techniques Increase Speed?</i>	171
<i>Input and Output</i>	172
<i>Input-Only Devices</i>	173
<i>Output Devices</i>	176
<i>Reducing a Bottleneck</i>	177
8. A PROLIFERATION OF COMPUTERS	182
Implications for Managers	183
The Computers of Today	183
<i>The Rise of the Mainframe</i>	184
<i>Powerful Supercomputers</i>	187
<i>Minis: The Beginning of the Revolution</i>	188
<i>The Personal Computer Has Changed Everything</i>	188
<i>The Server</i>	189
<i>The Network PC versus the Under \$1000 PC</i>	189
<i>Massively Parallel Computers</i>	190
<i>A Personal Assistant</i>	190
<i>Conclusions</i>	191
<i>Why So Many Types of Computers?</i>	192
9. SOFTWARE IS THE KEY	196
Managerial Concerns	197
<i>Programming Languages</i>	198

The Contribution of Higher-Level Languages	200	<i>Direction of Transmission</i>	261
<i>An Example of a Special-Purpose Language</i>	210	<i>How Are Signals Represented?</i>	262
<i>Fourth-Generation Languages Ease Programming</i>	210	<i>Speed of Transmission</i>	264
<i>Package Programs Are Another Alternative</i>	212	<i>What Is a Protocol?</i>	265
<i>The Web Browser and Internet Standards</i>	214	<i>Summary</i>	266
<i>The Operating System</i>	215	Networks	266
<i>Early Systems</i>	215	<i>Network Configurations</i>	268
<i>The Next Steps</i>	219	<i>Local Area Networks</i>	269
<i>Evolutionary Advances</i>	220	<i>TCP/IP: A Network Protocol</i>	271
<i>Operating Systems for Personal Computers</i>	221	<i>Going Wireless</i>	272
10. DATABASE MANAGEMENT	228	<i>Voice Considerations</i>	274
File Elements	229	The Advantages of Networks for Business	274
<i>Data</i>	229	<i>What Are the Alternatives for Wide Area Communications?</i>	275
<i>Direct-Access Files</i>	230	<i>Why Develop Private Networks?</i>	279
<i>Storage Media</i>	230	<i>Worries about Network Security</i>	280
<i>Finding Data on the File</i>	232	The Contribution of Communications	281
<i>More Complex Access</i>	232	<i>Electronic Mail As a Communications Tool</i>	281
Enter Database Management Software	234	<i>Electronic Data Interchange</i>	282
<i>Benefits of the Relational Model</i>	235	<i>Beyond the Model T</i>	283
<i>An Example</i>	236	<i>Building an Electronic Market</i>	285
<i>Normalization</i>	238	Transforming Organizations and the Economy	285
<i>Object-Oriented Databases</i>	240	12. NETWORKS AND ELECTRONIC COMMERCE	294
Databases in Systems Design	241	The Impact of Communications Technology	296
<i>Data Modeling</i>	241	Building Networks	296
<i>The Role of the Database Administrator</i>	244	<i>Commercial Network Providers</i>	298
<i>DBMSs in Building Systems</i>	244	A National Network Infrastructure: The Minitel System	299
<i>Oracle: An Enterprise DBMS</i>	245	Internet: A Case of Phenomenal Growth	302
<i>Distributed Databases</i>	246	<i>Intranets and Extranets</i>	309
<i>The Data Warehouse</i>	246	The Potential of Electronic Commerce	311
<i>Data Mining</i>	249	<i>The Nature of Markets</i>	315
<i>Changing Database Markets</i>	250	<i>New Business Models</i>	321
11. COMMUNICATIONS	258		
Communications between Computers	260		
<i>Codes</i>	260		
<i>Transmission Modes</i>	261		

Survey and Feasibility Study	416
<i>Costs and Benefits of New Systems</i>	416
<i>Identifying Systems Alternatives</i>	418
<i>Organizational Impact</i>	419
<i>Technological Feasibility</i>	419
<i>Contents and Format for a Study</i>	420
Determining Feasibility	420
<i>Selection Committee</i>	420
Selecting an Alternative	421
Undertaking Systems Analysis	423
Undertaking Systems Design	423
<i>Results of the Design Process</i>	423
General Design Considerations	424
<i>Client-Server Design</i>	425
<i>Graphical User Interfaces</i>	425
<i>Designing Web Sites</i>	426
<i>The Input Bottleneck</i>	428
<i>Handling Errors</i>	429
<i>Backup</i>	430
Computer-Aided Software Engineering	430
<i>Upper CASE</i>	431
<i>Lower CASE</i>	431
<i>Is Rapid Application Development a Solution?</i>	432
<i>What Is Conversion Effectiveness?</i>	433
APPENDIX A DESIGNING A DISTRIBUTED CLIENT-SERVER SYSTEM: THE HARDSERVE CASE STUDY	441
<i>Goals</i>	441
The Existing System	442
<i>Problems</i>	442
<i>Decision Considerations</i>	442
<i>Information Flows</i>	442
A Distributed System	442
<i>Systems Design</i>	442
<i>System Specifications</i>	446
<i>Systems Overview: The Local Store</i>	446
<i>Sales</i>	447
<i>Inventory Control</i>	448
<i>Connecting to the Warehouse</i>	450

<i>Inquiries</i>	451
<i>Systems Overview: The Warehouse</i>	451
<i>Filling Orders</i>	452
<i>Purchasing</i>	454
<i>Other Processes</i>	455
<i>The Database</i>	455
<i>Input and Output</i>	458
<i>Summary</i>	458

APPENDIX B AN OBJECT-ORIENTED EXAMPLE	460
Objects and Classes	460
<i>Creating Subsystems</i>	466
<i>Observations</i>	469

17. ENHANCING THE LIFE CYCLE: PACKAGES AND OTHER NONTRADITIONAL TECHNIQUES	470
For Whom Are These Approaches Intended?	471
High-Level Design Tools	472
General Packages	473
Dedicated Packages	474
<i>Advantages of Packages</i>	474
<i>Disadvantages of Packages</i>	475
<i>Package Design</i>	476
<i>A Classification Framework for Packages</i>	477
<i>An Example of a Package</i>	480
<i>Acquiring Packages</i>	481
<i>Implementing Packages</i>	482
<i>Conclusions</i>	484
Prototyping	484
<i>How to Develop a Prototype</i>	485
<i>An Example</i>	487
A Range of Alternatives	488

18. REENGINEERING: CHANGING BUSINESSES AND BUSINESS PROCESSES	493
What Is Reengineering?	494
What Is a Process?	496

Knowledge Discovery	614
Neural Networks	614
<i>Case-Based Reasoning</i>	617
<i>Genetic Algorithms</i>	618
<i>Intelligent Agents</i>	620

PART SIX

Issues for Senior Management

23. MANAGEMENT CONTROL OF INFORMATION TECHNOLOGY	629
Management Control	630
<i>Control Theory</i>	630
<i>Control in the Organization</i>	631
<i>Failure of Control</i>	633
<i>Information and Control</i>	633
Control of Systems Development	635
Control of Operations	637
Control and Electronic Commerce	640
Auditing Information Systems	641
Management Issues	642
Security Issues: Viruses, Worms, and Other Creatures	642
24. INFORMATION TECHNOLOGY ISSUES FOR MANAGEMENT	650
Management in a Technological Environment	651
<i>What Do CEOs Think?</i>	651
<i>A Political Model of Information Technology</i>	651
<i>The Chief Information Officer</i>	653

<i>The Corporate IS Department</i>	655
<i>A Vision and Plan for IT</i>	656
<i>Outsourcing as a Strategy</i>	659
<i>How Much to Invest in IT</i>	662
<i>Estimating Value</i>	662
<i>Making the Investment Decision</i>	665
<i>A Summary of Issues in Managing IT</i>	669
The Changing World of Information	669
Action Plan	670
<i>Use IT Design Variables to Structure the Organization</i>	671
<i>Determine and Communicate Corporate Strategy</i>	671
25. SOCIETAL IMPLICATIONS AND THE FUTURE WITH TECHNOLOGY	675
Social Responsibilities	676
<i>Technology</i>	676
<i>Applications of IT</i>	679
<i>The Impact of IT</i>	681
<i>Some Suggested Solutions</i>	687
Ethics and Information Technology	691
The Future with Information Technology	693
Change Revisited	693
Glossary	700
Bibliography	713
Sources for Applications Briefs	719
Index	721
