

DEVELOPMENTS IN AQUACULTURE AND
FISHERIES SCIENCE VOLUME 37

Edible Sea Urchins: Biology and Ecology

SECOND EDITION

Edited by
John M. Lawrence

Contents

Preface to the first edition	xix
Preface to the second edition	xxi
List of Contributors	xxiii
1 Edible Sea Urchins: Use and Life-History Strategies	1
<i>John M. Lawrence</i>	
1 Prehistoric Fishing of Sea Urchins	1
2 Contemporary Commercial Fishing of Sea Urchins	2
3 Aquaculture of Sea Urchins	2
4 Edible Sea Urchins	3
5 Life-History Strategies of Sea Urchins	3
6 Conclusion	6
Acknowledgments	6
References	6
2 Gametogenesis and Reproduction of Sea Urchins	11
<i>Charles W. Walker, Tatsuya Unuma, and Michael P. Lesser</i>	
1 Introduction	11
2 Structure of the Gonads of the Sea Urchin	11
3 Interacting Gametogenic and Nutritive Phagocyte Cycles in the Sea Urchin Gonad: Stages, Physiology, and Molecular Biology	13
3.1 Stages in Gametogenesis	13
3.2 Nutritive Phagocytes in Ovaries and Testes	14
3.3 Inter-gametogenesis and NP Phagocytosis	14
3.4 Pre-gametogenesis and NP Renewal	18
3.5 Gametogenesis and NP Utilization	19
3.6 End of Gametogenesis, NP Exhaustion, and Spawning	22
3.7 Environmental Control of Gametogenesis	23
4 Conclusions	26
Acknowledgments	28
References	28

3	Biochemical and Energy Requirements of Gonad Development	35
	<i>Adam G Marsh and Stephen A Watts</i>	
1	Introduction	35
2	Cellular Energy Utilization	35
3	Energy Metabolism During Development	37
4	Biochemical Components of Cellular Metabolism	39
5	Gonad Growth	40
6	Gonad Energy Metabolism	42
6.1	Protein Metabolism	43
6.2	Carbohydrate Metabolism	45
6.3	Anaerobic Metabolism	46
7	Feeding and Metabolism	47
8	Summary	49
	Acknowledgments	50
	References	50
4	Endocrine Regulation of Sea Urchin Reproduction	55
	<i>Kristina M Wasson and Stephen A Watts</i>	
1	Sea Urchin Gonad	55
2	Exogenous Regulation of Reproduction	55
2.1	Environmental Factors	55
2.2	Endocrine Disruptors	55
3	Endogenous Regulation of Reproduction	56
3.1	Steroids	56
3.2	Protein and Peptidergic Factors	63
3.3	Catecholaminergic and cholinergic factors	64
4	Mechanisms of Regulation	65
4.1	Paracrine	65
4.2	Endocrine	66
5	Gene Regulation in Reproduction	66
6	Conclusions	67
	Acknowledgments	67
	References	67
5	Echinoid Larval Ecology	71
	<i>Larry R McEdward and Benjamin G Miner</i>	
1	Introduction	71
2	The Echinoid Life Cycle	71
3	Life Cycle Diversity	72
4	Echinoid Larval Diversity	73
5	Reproductive Ecology	75
5.1	Egg Provisioning	75
5.2	Fertilization Ecology	75

6	Larval Ecology	76
6.1	Reproductive Strategies	76
6.2	Feeding	77
6.3	Larval Growth	78
6.4	Phenotypic Plasticity	79
6.5	Swimming	79
6.6	Mortality and Defense	80
7	Recruitment Ecology	81
7.1	Larval Transport and Dispersal	81
7.2	Settlement	82
7.3	Metamorphosis and Recruitment	83
8	Conclusions	85
	Acknowledgments	85
	References	85
6	Growth and Survival of Postsettlement Sea Urchins	95
	<i>Thomas A Ebert</i>	
1	Growth	95
1.1	Introduction	95
1.2	Skeletal Composition	95
1.3	Resorption	99
1.4	Natural Growth Lines	101
1.5	Tagging	103
1.6	Growth Models	108
2	Survival	123
	Acknowledgments	127
	References	128
7	Feeding, Digestion, and Digestibility	135
	<i>John M Lawrence, Addison L Lawrence, and Stephen A Watts</i>	
1	Ingestion	135
1.1	Food Chemistry	135
1.2	Environmental Conditions	138
1.3	Food Shape	140
1.4	Physiological State	140
2	Digestion	142
2.1	Structure of the Gut	142
2.2	Digestive Enzymes	143
2.3	Gut Transit Time	145
2.4	Role of Microorganisms in Digestion	146
3	Digestibility	148
4	Conclusions	151
	Acknowledgment	151
	References	151

8	Carotenoids in Sea Urchins	159
